Experience Productivity, Speed, and Convenience when Correcting Dragon-created Documents!

✓ Efficiently edit Dragon transcribed documents with foot pedal control

✓ Read along: see *and* hear dictation for greater accuracy

•Quickly Remove mistakes and Proof Dragon-produced documents under foot Pedal control...

While listening to the Author's voice...
Without Typing!

Listen and Review under pedal Control...only type occasionally to correct a word that wasn't automatically suggested in Dragon's dictionary

Increase the speed and accuracy of editing Dragon-produced transcription with Start-Stop Transcription Made Easy. Read along while listening to the author's voice and quickly correct mistakes with efficient foot pedal control.

Transcription Made Easy's integrated interface works with Dragon NaturallySpeaking (Pro, Medical, Legal, and Preferred versions) and Microsoft Word (2000 and above) to provide the fastest and most accurate transcription editing tools available.

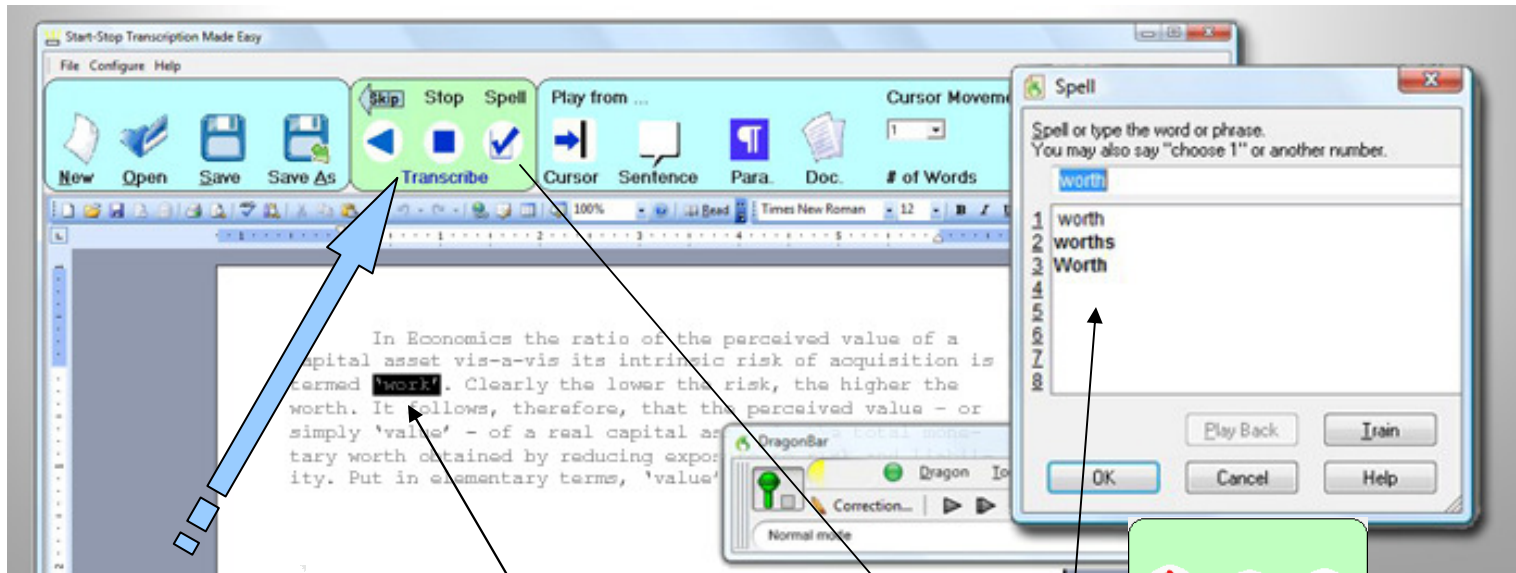

The USB Plug 'n Play foot pedal control is familiar to transcriptionists and intuitive for beginners. TME also includes the ability to backup text and audio files to a location of your choosing.

Comparison Chart – Benefits of Using Transcription Made Easy

Transcription Made Easy (TME)	Dragon’s Transcription Correction Bar Alone	Benefit of Using TME
Full foot pedal support for playback	Requires clicking on toolbar or hotkey	Foot pedal support leads to higher correction/ transcription throughput.
Precision stop of playback for editing	Pressing stop takes cursor back to original location	This precision placement of cursor reduces the time necessary to place cursor for correction
Precise number of words to traverse	Skip back and skip forward will move the cursor a "few words" in the chosen direction	The precision in TME makes for quicker editing
Pedal support for <u>skip back, skip forward</u>	This editing is invoked through mouse clicks on the toolbar or hotkeys	Pedal support is more efficient
One click direction shift and multi-move mode provide <u>lightning quick cursor movement</u> for editing	The mouse clicks and general movement can cause delays	TME allows for one-click change in the direction for foot pedal cursor movement. In addition, the holding down of the left pedal re-invokes the cursor movement function on a successively faster rate for user-directed speedy cursor movement.
Optional backup of Word document and associated .dra file	Dragon’s dictated “.dra” files can become corrupt when changes are made to document. User can lose the ability to hear the voice with the text.	<u>Safety and security</u> for your dictation and transcript

Comparison Chart – Benefits of Using Transcription Made Easy

Transcription Made Easy (TME)

**“Transcribe Aide™”
From Belgium**

Benefit of Using TME

Documents opened into 3rd-party Word processor	Documents opened into 3rd-party Word processor	This feature leverages the users knowledge of Word, and allows full use of the extensive features, including macros and bookmarks, of MS Word during transcript correction
Configurable Hot Keys	Hotkeys are static	The user can select the keys that they prefer for specific functions like playing from cursor, or skipping back a number of words
Simple Interface	Multiple toolbars and menu choices	The focus of TME is on foot pedal controlled transcript editing. This focus yields an easy to learn, easy to master application that does only those things you want done.
Price	\$700+ Corporate Edition	\$149 with USB Foot Pedal and Lifetime Tech Support included.
