

Quick Setup Guide for Start-Stop® STUDENT EDITION Transcription Software

(for more detailed setup information, you may refer to the Instruction Manual in Adobe PDF format, located in the Documentation folder of your CD-ROM)

- 1) For the **USB 3-Pedal unit**, do **not** plug the pedal in at this time.
- 2) Insert the Start-Stop® Installation CD-ROM into your computer. We recommend that you temporarily disable all Anti-Virus and Anti-Spyware software, as well as any other applications that may be running on your PC, prior to installing. **The Start-Stop® Installation Software should begin automatically after several seconds.** If so, please skip to step 5). If not, continue to step 4).
- 3) If the Install Software did not come up on the screen automatically as described in Step 3) above, then you will need to manually launch the installation: From the Windows START button, select RUN and then type **d:\setup** and click on OK. (If your CD-ROM is drive "e" instead of drive "d", then you would type **e:\setup** instead, and so on). The Start Stop Install Software will appear on your screen.
- 4) Follow the on-screen instructions, and answer "OK" or "Yes" to questions asked. When the FINISH button appears, **be sure to reboot your PC.**
- 5) After re-booting, Click on the **Start-Stop Universal Transcription System Icon** on your desktop. **You will see a screen appear (Figure 1).** SELECT the 3-Pedal, USB as shown, and click OK.

Figure 1

After selecting the pedal type, the software thanks you for selecting the pedal; Click OK again.

- 6) **USB PEDAL:** With your PC up and running normally, **connect the pedal to your USB port.** A new device will be recognized when you plug in the pedal. Windows 7, XP and VISTA will usually automatically install the new USB pedal device without your intervention.
- 7) Click on the **Start Stop Universal Transcription System Icon** on your desktop. You will see this screen:

Installation is now complete!
