Experience the convenience of call-in dictation without the cost of a server!

The Start-Stop Call-In Recorder is a PC based call-in dictation system that combines the features of a traditional call-in dictation system with the versatility and ease of use of a PC. Dictate on the road, from across the office, or from home with your cell phone, land line, or VOIP line. The Start-Stop Call-In Recorder is available in two and four line systems. Use our intuitive call-in software to easily create author IDs, manage files, and customize settings. Dictation is stored on the PC, allowing virtually limitless storage capacity.

The Start-Stop Call-In Recorder is perfect for legal and medical practices looking for a low cost alternative to typical call-in systems, or are looking to reduce the cost of providing handhelds while maintaining mobility.

The Start-Stop Call-In Recorder is also an ideal replacement for aging Lanier or Dictaphone call-in systems. Call us at **(866) 254-0714** and let our dictation and transcription specialists help you equip your office for mobile dictation.

The telephony box plugs into your PC's USB port and connects with up to four telephone lines

Call-In Recorder Advanced Features

© 2009 All Rights Reserved – HTH Engineering, Inc. Tarpon Springs, FL 34688 TEL: (727) 939-8853 <http://www.StartStop.com>

PC-based call-in dictation: Avoid the cost of expensive call-in systems while providing remote and mobile dictation.

Integrates with your network: Share files over your network to increase the speed of transcription.

Effective replacement for handhelds: Outfitting a large office with handheld recorders can become costly.

Simple Intuitive Interface: Get up and running within 30 minutes with our quick start guides and easy to use user interface.

Compatible with most transcribers: Output files in standard .wav to work with the Start-Stop UNIVERSAL Transcription System and most third-party transcribers

Start-Stop UNIVERSAL Transcription System: A special version of our [Start-Stop UNIVERSAL Transcription System](#) natively plays the .wav files created by the Start-Stop Call-In System with integrated demographic information.

Demographic Information: Sort through demographic information easily to track author, date and time, work type, subject number, and department number.

Custom Profiles: Custom profiles allow each user to specify the recording settings that best suit them. Even record custom greetings for dictation users.

Hard drive storage: Dictation is stored to your hard drive, allowing virtually limitless capacity.

Keypad Customization

Select from several pre-made keypad configurations, such as the Dictaphone and Lanier Emulation modes, or create your own, even ones unique to a single user.

Dictaphone Emulation (2)

1	2	3	
4	5	6	
*7	7	8	9
*	0	#	

Lanier Emulation (3)

1	2	3	
4	5	6	
*7	7	8	9
*	0	#	

We include full technical support for setting up and configuring your new Start-Stop Call-In Recorder.

Professional Foot Controlled Transcriber for Start-Stop Call-In Recorder

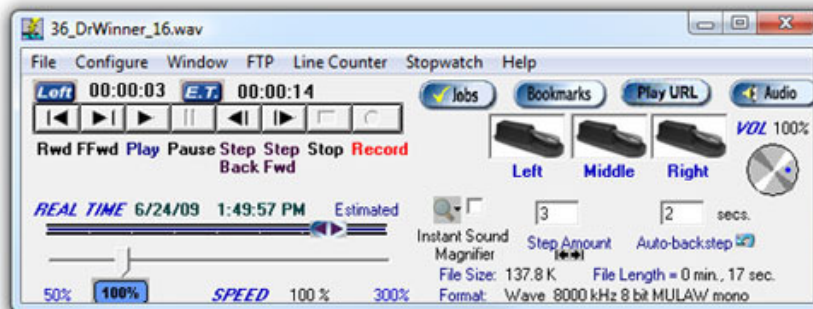

The Start-Stop UNIVERSAL Transcription System has been an industry leader in PC transcription since its original version over a decade ago. This special version of The Start-Stop UNIVERSAL transcriber works with the special files used with the Start-Stop Call-In Recorder, allowing fast network based transcription while tracking important demographic and file information.

This program is based on our [Start-Stop UNIVERSAL Transcription System](#) with [Network Pro](#) with additional features uniquely suited for use with the Start-Stop Call-In Recorder. Combined, the Call-In Recorder and Start-Stop Transcriber make an ideal solution for small, medium, and large sized offices with up to 300 dictation authors and several full or part-time transcriptionists.

Three pedal USB Plug N' Play foot switch allows for simple, hands-free control so you never have to take your attention away from the job.

See a Real-time View of Incoming Dictation from the Start-Stop Call-In Recorder!

The main interface screen shows realtime information about the current job file. Easily change the playback speed, set bookmarks, adjust volume, and customize your playback options.

The **Start-Stop UNIVERSAL Transcription System for Call-In Recorder** is network enabled, allowing you to share, track, and archive jobs across the local network. This allows several transcriptionists to work on a pool of jobs without overlap. Automatic notification informs the transcriptionists that new dictation has been completed and is available for transcription.
