**Continuously Record Meetings in Stereo with Overlapping Segments**

HTH Engineering, Inc. is proud to present the **Start-Stop® SuperFlow Continuous Recording System.**

**It's the perfect tool for Legislatures, Congressional and Courtroom hearings, or anywhere that final transcript results are needed quickly.**

- Transcribe long meetings in nearly real-time, with outputted transcript available only minutes after the meeting ends, instead of hours.
- User-Adjustable Segment length and overlap
- Stereo (2-channel) recording at 44 KHz for crystal-clear recordings
- Industry-Standard MP3 Output
- Recorded conference segments are outputted as each one is completed, so that the transcription pool can begin work immediately.
- User Control over destination directory for recordings (local or any network path), as well as Session Name
- User annotation log allows on-the-fly entering of a note for each recorded segment, along with outputted time-stamped TXT file.

## Companion Start-Stop Universal Transcription System for SUPERFLOW

The Start-Stop Superflow Recording System is combined with the companion Start-Stop Transcriber, to create an ideal recording solution for legislative councils, congressional hearings, committee meetings, hearings, and conferences.

## Professional Foot Controlled Transcriber For Start-Stop Superflow Recorder

\$399.00

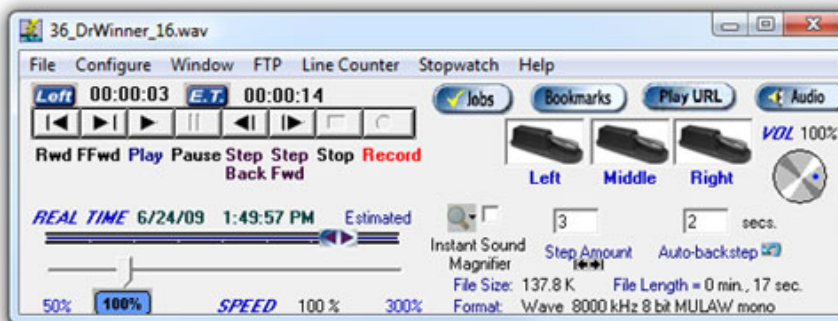

The Start-Stop UNIVERSAL Transcription System has been an industry leader in PC transcription since its original version over a decade ago. This special version of The Start-Stop UNIVERSAL transcriber works with the special files used with the Start-Stop Superflow Recorder, allowing fast network based transcription while tracking important demographic and file information.

This program is based on our [Start-Stop UNIVERSAL Transcription System](#) with [Network Pro](#) with additional features uniquely suited for use with the Start-Stop Superflow Recorder. Combined, the [Superflow Recorder](#) and Start-Stop Transcriber make an ideal solution for legislative councils, congressional hearings, committee meetings, hearings, and conferences.

**See a Real-time View of Incoming Meeting Recording Segments from the Start-Stop Superflow Recorder!**

[Click to enlarge image.](#)

The main interface screen shows realtime information about the current job file. Easily change the playback speed, set bookmarks, adjust volume, and customize your playback options.

## Companion Start-Stop Universal Transcription System for SUPERFLOW (continued)

The Start-Stop UNIVERSAL Transcription System for Superflow Recorder is network enabled, allowing you to share, track, and archive jobs across the local network. This allows several transcriptionists to work on a pool of jobs without overlap. Automatic notification informs the transcriptionists that new dictation has been completed and is available for transcription.

- **Automatic Notification:** The program notifies transcriptionists of new and incoming work as it is being recorded by the Superflow Recorder.
- **Work Pool Sharing:** Several transcriptionists can share and track work without overlap, making this the perfection dictation/transcription system for small, medium or, large offices up to 300 authors.
- **Job Manager:** Automatically sort dictation by author, job type, time, length, or priority.
- **Productivity Tracking:** Automatically archive completed dictation while allowing a supervisor or transcriptionist the ability to track work accomplished and work remaining.

## Dynamically View and Manage Incoming Dictations with Real-Time Work Sharing and Comprehensive Author Date-Time Priority Included!

The Start-Stop Superflow Recorder collects demographic data which is then displayed in the UNIVERSAL Transcription System for Superflow Recorder Job Manager. This allows transcriptionists or supervisors to set priority or distribute the workload across several transcriptionists.

## Companion Start-Stop Universal Transcription System for SUPERFLOW (continued)

### Convenient Bookmarking

*Set up to 16 bookmarks per dictation file.*

### Foot Pedal Transcription

The Start-Stop UNIVERSAL Transcription system is designed to be a complete, professional-grade transcriber. Included are many time saving, efficiency, and reporting features, including:

- **Ultra Job Manager:** Track new and complete dictation, queue jobs for continuous transcription, and archive completed dictation.
- **Variable Speed Control:** Change the speed of dictation between half speed and three times speed with no distortion.
- **Smart Line Counter:** Accurately determine your line count for billing and productivity reporting.
- **Intuitive Graphical Interface:** Run the program in the background or as a taskbar where you can track information about the file in realtime.
- **Complete Control:** Run the Start-Stop UNIVERSAL Transcription System in the background while you control dictation with foot pedal control, mouse, or keyboard shortcuts.
- **No Extra CODECs Required:** Transcribe dozens of digital formats without needing to download additional audio codecs.
- **Built in FTP Client:** Automatic FTP upload and download feature allows incoming called-in dictation to be automatically uploaded for sharing with off-site or remotely located transcriptionists.
- **Plug N' Play Foot Pedal Control:** The ergonomic USB 3-pedal foot control allows you to stop, play, step-back, rewind, and fast forward through dictation for complete control.
