[Low Pricing](#)

HTH Engineering is a true engineering, development and manufacturing firm in business since 1986.

- Degreed, highly trained electrical, software, and mechanical [engineering staff](#).
- Experienced, friendly, and smart technicians.
- All items advertised always in stock.
- We have warehouses across the US—offering quick delivery.
- Olympus Authorized Professional Line Dealer.
- Philips Master Digital Centre Pro Authorized Dealer.
- Member of Better Business Bureau, MTIA, and AHDI.

Unlimited Tech Support, with deluxe installation support via telephone , GoTo Meeting Presentations, and Microsoft Net Meeting (tm).

Once you have made a purchase, we can walk you through step-by-step over the phone and even set it up for you * during setup, installation, or use.

* For those customers who are using high speed internet connections, a new form of tech support is now available. This new way of providing tech support utilizes **on-line collaboration tools**. GoToMeeting allows the tech support technicians to view your computer remotely and allows them to assist you just like they were sitting right in front of your computer.

We Listen! Our unique, focused, innovative products are a result of direct feedback with our customers (medical transcriptionists, physicians, and attorneys):

The **Start Stop Universal Transcription System** The world's favorite UNIVERSAL transcription system (foot pedal and software):

- Plays a large number of file types, both standard and non-standard, so you don't need to settle for a "1-trick pony" transcription system that only plays one company's format.
- **Free software upgrades for the life of the product**, and toll-free tech support means you'll never be out of date with the Start Stop.
- Reliable pedal technology lasts for years under normal use.
- As new formats emerge in the industry, we add them to our latest upgrade, available free of charge to all Start Stop owners.

The **Start Stop PowerPlay** is the world's best DVD transcriber for PCs and supports a vast number video formats, as well as web-based streaming and multimedia formats.

- Now you can transcribe video as easily as you transcribe audio!
- Perfect for transcribing Law Enforcement video interviews on DVD, streaming MP3, WMA, music, and voice from the Web; Courtroom Hearings and Proceedings, Hollywood Movies, TV Closed-captioning, Video Time-coding, City Council Meetings, Focus Groups, Corporate Boardroom meetings, Oral History Interviews and University Research Videos.

www.startstop.com

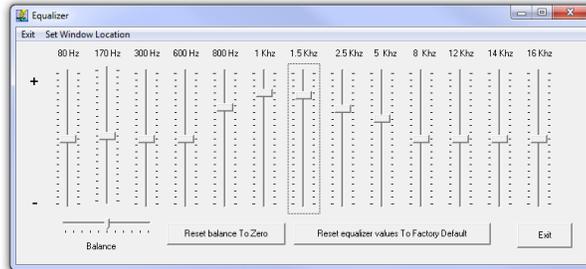

Start-Stop Universal PRO+ Transcription System Version 14

Constant Pitch (Variable Tempo) Playback
 Allows you to slow down words, without changing the pitch of the voice. If the speaker is speaking too quickly, just slow them down!

PRO+ New 16-band Graphic Equalizer allows you to clarify and improve audio quality for difficult recordings
 Reduces microphone hiss or hum, air conditioning rumble, lawnmowers, motors, and high-frequency sounds for easier transcription

Boosts voice frequencies for increased clarity

Improves recordings where the voice is muffled, by emphasizing the higher frequencies (consonants)

PRO+ New Support for Secure FTP (SFTP) as well as FTP for File Transfer

If your company stores files on an SFTP or FTP server, you can automatically upload and download them directly into your computer (and display them using the Start-Stop Job Manager for example).

PRO+ New Built-In File-Splitting Technology with Overlap Options

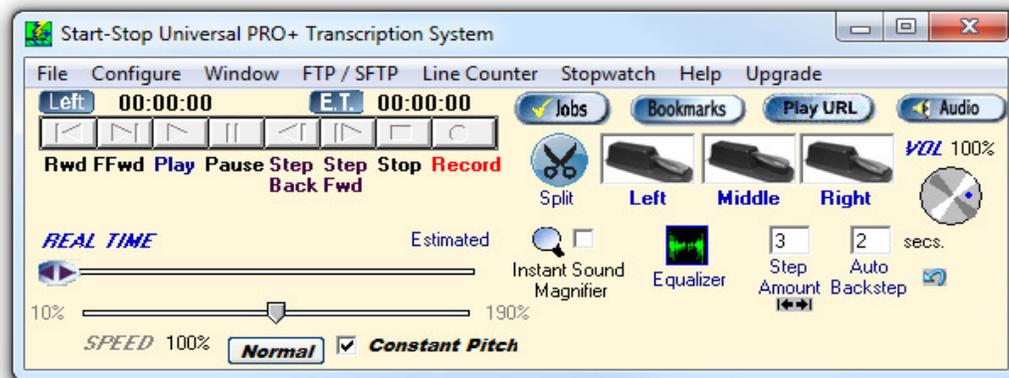

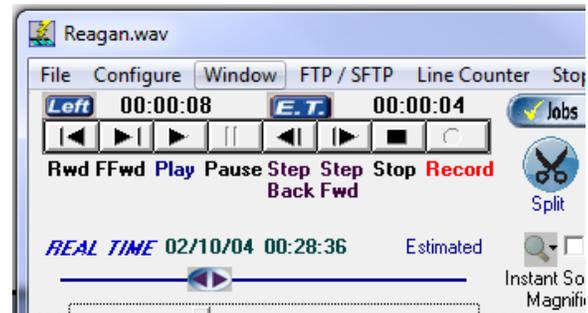

Now take a huge or long recording and split it automatically into smaller pieces, to share work with other transcriptionists or just to make the long recording more manageable. You can also use this feature just to grab and save the relevant portion of a recording, discarding what isn't needed to be transcribed.

PRO+ Detailed Split Options

Split with Overlap: you can set some overlap between the split file segments for continuity, so you don't chop off in the middle of a word

PRO+ Multiple SAVE AS options (converting) for a large variety of formats Save as WAV, Truespeech WAV, or MP3

PRO+ New Audio Extraction (Ripping) Feature for Video Files

Start Stop Universal version 12

New in Version 12:

VERSION 12.0 Standard Edition

With TrueSpeech™, Ultra-Play, Variable Speed, Bookmarks, File Conversion, Job Manager, Smart Line Counter, Auto-Notify, Constant Pitch, and Work Sharing

Perform foot-pedal activated transcription on any sound-card equipped PC using Windows™ 8, Windows™ 7, Vista, XP, ME, 2000, or Windows™ 2003/2008 Server

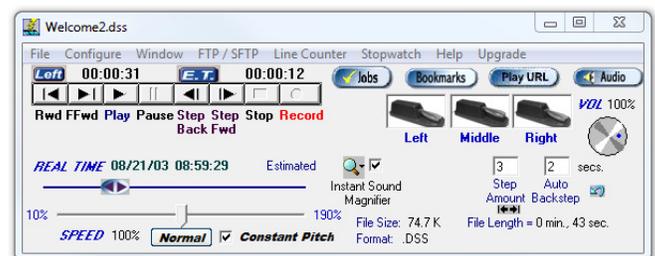

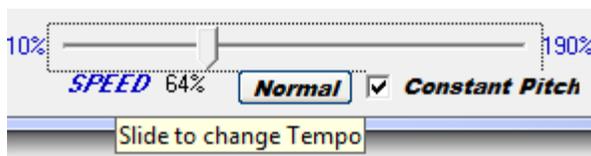

Turn your PC into a universal, high-quality transcription machine, using your feet to activate up to 3 separate foot pedals.

- **Windows 8™ Supported, in addition to previous Operating Systems** including Windows 7, Windows Vista, Windows XP, Windows ME, Windows 2000, and Windows™ 2003/2008 Server!

- Constant Pitch (Variable Tempo) Playback

Allows you to slow down words, without changing the pitch of the voice! If the persons speak too fast, just slow them down!

- New Support for Secure FTP (SFTP) as well as FTP for File Transfer

Now supports both SFTP as well as regular FTP. If your company or a company for which you work stores files on an FTP server, you can now automatically upload and download them directly into your computer (and display them using the Start-Stop Job Manager for example).

Multiple SAVE AS options (converting) for a large variety of formats

- Save as WAV, Truespeech WAV, or MP3

Anything you can play with the Start-Stop, you can save/convert to a standard format.

Enhanced Ease of Installation on Limited Rights PCs

- User Account Control (UAC) can remain enabled after installation

- Works well with limited user rights computers (installation is quick, under local admin)

Enhanced Job Manager: New Columns Added for Priority, Duration and Job Comments and Notes

The complete transcriber

www.StartStop.com

The **Start-Stop UNIVERSAL Transcription System** is a professional grade PC-based, foot-pedal controlled transcriber that has been making industry waves since its introduction over a decade ago. **Control the speed and playback of virtually any digital recording or dictation**—pause, play, step-back, and fast-forward without taking your hands from the keys or your attention away from your word processor. The Start-Stop UNIVERSAL continues to be unique with its lifetime free upgrades guarantee, a wide range of supported audio formats, and a focus on **improved workflow and efficiency for medical transcriptionists, court reporters, conference recording, legal transcription, educators, corporations, and government.**

Includes: Start-Stop UNIVERSAL Transcription System Version 12 on CD-ROM, Infinity 3-Pedal USB Footswitch, Network Pro Upgrade, Spectra PC Headset, User Manual, Free Concierge Technical Support, Lifetime Free Upgrades, One Year warranty on hardware.

Model		Retail Price
#30010	Infinity 3-Pedal USB Footswitch, Network Pro Upgrade, Spectra PC Headset.	\$189.00
#30355	Start-Stop software package only, digital delivery.	\$ 85.00
#30350	This model does not include a foot pedal, CD-ROM software package only.	\$ 99.00

Everything you need to get started: load files, adjust settings, and monitor pedal functionality in one place.

- **1. Playback Controls and Information:** Use mouse controls to quickly scan through files while you monitor the remaining and played file duration.
- **2. Bookmarks:** Set up to 16 bookmarks per file with hotkey control.
- **3. Play URL:** Open and transcribe directly from internet hosted files.
- **4. Job Manager:** Job manager allows you to queue files, view demographic information, set continuous play, and archives completed files.
- **5. Instant Sound Magnifier:** Slows down quickly-spoken words and phrases automatically if selected.
- **6. Step options and Pedal Monitor:** All pedal clicks are displayed on the interface for simple, accurate feedback. Set the step amount and auto-step amount to suit your particular style.
- **7. Constant-Pitch, Variable Speed (Tempo) Control:** Slow playback speed to as little as 10%, or increase it by as much as 190%, without changing the pitch of the user's voice!
- **8. File Information:** Quickly view file details: format, file size, and length.

We are proud to announce Version 12 of Start-Stop UNIVERSAL Transcription System, with even more additional new features: Now Windows 8 (January 2013), Windows 7® supported, [Start-Stop Yodal for BlackBerry®](#), [myDictation iPhone®](#) MP3, audio playback support of 11 multimedia new formats (RM, IVF, MTS, MPEG, MPG, VOB, MP4, F4V, MOV, WMV, FLV), new file Drag 'n Drop, SPX (Speex) support, and new standalone optional versions for use with [Start-Stop Call-in System](#), [Start-Stop Goldenear PRO 4x](#), and [Start-Stop Superflow Continuous Recording System](#). Also we are including the [Network Pro upgrade free](#) with version 12. This networking add-on for Start-Stop UNIVERSAL makes work-sharing with other transcriptionists easy and efficient.

This is all in addition to supporting the [virtually every audio format in the industry \(standard and proprietary, for example, WAV, MP3, WMA, DSS, VOX, VOC\)](#). Whatever you need to play and transcribe under foot pedal control, Start-Stop UNIVERSAL is the perfect [multi-purpose](#) transcription tool to help you get the job done.

The Start-Stop UNIVERSAL is compatible with Microsoft Windows 98, Windows 2000, Windows ME, Windows XP, Windows Vista, Windows 7 and Windows 8 (January 2013).

Start-Stop 4-Channel Transcriber

www.StartStop.com

<http://www.startstop.com/sst4ch.asp>

Convenient, Powerful, Easy-to-Use Channel Playback Control

Exclusive Artificial Intelligence Interface automatically Matches up Recordings from the recorders for Playback

You can label each microphone channel for that particular meeting

User-Settable Hotkeys Control which channel(s) are played back

Convenient hotkey for "ALL" Channels at once playback

Convenient hotkey allows cycling Through 1, 2, 3, 4, ALL channel

You can choose which channels you consider "Active" in your "ALL" group.

Exclusive SYNC Adjust Bar allows Instant echo removal in a large room, Or sync correction for any recording

Active Channels show as Red Lights. Clicking with your mouse on any channel Turns it on by itself for "ZOOM" to that microphone; Clicking on the Green Triangle returns to "ALL" mic playback

- **Full Bookmarking and Labelling:** Bookmark up to 16 spots in a single recording.
- **Customized Hotkeys:** Set hotkeys to fit your transcription needs, label microphones, and easily switch between channels.
- **Sync Adjust Bar:** Easily sync up microphones to remove echoes in large, hollow rooms.
- **Automatic File Synchronization:** The program's artificial intelligence automatically syncs the two stereo audio files created during the recording process.

Features of the Main Transcriber Screen

Displays files loaded from the two recorders

Time Remaining and Elapsed Time Displays

Real Time Slider can be moved Instantly to any point in the recording

Speed Control allows you to Speed up or slow down the recordings From 50% of normal speed to 300% of normal Speed, in 1% increments

Ability to set up to 16 Bookmarks and label them Per recording, and return to Them later.

Olympus AS-5000 PC Transcription Kit

Olympus AS-5000 PC Transcription Kit

The AS-5000 Kit is designed to work with the DS-5000, DS-5000iD, DS-3400, and DS-2400 Digital Voice Recorders. The new transcription module makes secure file management very user friendly.

This software can also be configured to allow direct FTP server connections. **Typist Alert** provides visible or audible alerts when new files are received. Encrypted files can easily be decrypted with the AS-5000 software.

Features:

- **New Features** - Citrix and Terminal Service support is provided. It is compatible with POP3, SMTP, IMAP MS Outlook, GroupWise, Lotus Notes and Extended MAPI email environments. SSL support for eMail as well.
- **Auto Opening of Templates** - With this setting, you can link a template to an author's name or to a work type.
- **New E62 Headset** - You will find this improved headset to be more durable, more comfortable, and more pleasing to listen to.
- **Document Auto Creation Function** - Automatically returns the document to the sender from whom it was sent or to any other specified location.

The **AS-5000** combines with any professional digital voice recorder from Olympus to provide a complete, end-to-end business solution.

This powerful transcription kit will allow for playback of the DSS Pro(.ds2 format) files produced by the new DS-5000 and DS-5000iD digital voice recorders. Complete with footswitch, headset, and powerful software, the AS-5000 can easily be integrated into the workflow of any office system and significantly streamline data sharing and distribution of dictations between professionals, departments, and office locations. Special E-mail and FTP functions enable dictation files to be automatically routed to predetermined

RS-27 Footswitch

Connect to the serial or USB port of a PC for hands-free transcription convenience. For hands free dictation, connect to the docking station (DS-5000iD/DS-5000).

E-62 Headset

High quality stereo headset for PC with extra long cable (3m). Two different kinds of ear pads (round or conical) are included to use depending on personal preference.

E-102 Headphone

Stereo headset for PC with extra long cable.

Olympus AS-2400 PC Transcription Kit

For dedicated transcription needs, Olympus offers the optional AS-2400 Transcription Kit which includes a footswitch and headset for hands-free operation. The AS-2400 guarantees easy transcriptions of any DSSPro recordings. Data can be labelled according to importance or priority and files can be viewed at any time. It allows easy transfer from the voice recorder to the secretary's office. Besides the DSS Player Standard Transcription Module, the kit also includes the RS-27 footswitch and the E-102 stereo headset to make hands-free operation of the DS-2400 possible.

- Includes: RS-27 footswitch, E-102 headset and transcription software module
- Manages DSSPro, DSS, WAV, WMA, and MP3 audio
- Individual sorting/organization of dictations and documents
- DSS file management using separate folders
- Job status info (e.g. finished, pending, cancel job)
- Author ID setting by software
- Add new sub folders in dictation folder
- Use shared folder via LAN
- Noise cancellation
- Playback speed control
- Intro scan
- Automatic startup when recorder is connected

"When we first started our transcription company, we went to HTH Engineering, and ALL of our transcriptionists use Start Stop equipment. It is the best!!! You wouldn't believe the amount of outsourcing of work that can be done in this manner, which will allow you to take on more and more business. We've grown from one person less than seven months ago to over 26 people now and we're still growing."

Olympus DS-3400

Olympus DS-3400 Professional Dictation Voice Recorder

Click here to chat live with a **Sales Engineer**

The Olympus DS-3400 Digital Recorder fills the niche between the DS-5000 and the DS-2400 providing feature-rich recording in either the industry-standard .dss format or the high-tech .ds2 format. The DS-3400 includes three programmable buttons, removeable media, editing functions, and ships with the intelligent DSS Player Pro Dictation software.

This personal dictation recorder is ideal for any professional, student, or hobbyist that requires many of the productivity features that define the Olympus digital recording lineup, excellent audio quality, and the ease-of-use and interfunctionality of the .dss recording format.

Engineering Expertise

Olympus DS-3500

www.StartStop.com

NEW! Olympus DS-3500 Professional Digital Recorder
Windows 7 / Vista / XP, Mac OS and Dragon Compatible!

The **Olympus DS-3500** Professional Dictation Recorder provides superior sound quality through a speech-optimized, mechanically isolated microphone; flexibility in recording modes, including conference and dictation modes; and multiple file formats—DSS Classic, DSS Pro, WAV and MP3. Through the included Olympus Dictation Management System, once plugged in via USB, the DS-3500 will automatically transfer recordings across the network or through email. The DS-3500 features 128- and 256-bit encryption for security (HIPAA medical use) as well as a **5-Star Dragon Accuracy Score** (for use with optional [Dragon Naturally Speaking](#) or [Dragon Medical Practice Edition](#)). The latest generation of Olympus professional dictation recorders is the most flexible handheld recording system available today and will dramatically enhance your productivity and daily workflow!

The little brother of the [Olympus DS-7000](#), the DS-3500 features the same great audio and workflow capabilities and only sets aside certain creature comforts, specifically, the DS-3500 has push-button operation rather than a slide switch and does not include a docking station. The DS-3500 does feature WAV and MP3 file formats which are not available with the DS-7000.

Package Includes:

- Olympus DS-3500 Professional Digital Dictation Recorder
- 2 GB internal Micro-SD memory card
- LI-42B lithium-ion battery
- USB standard to USB Mini 2.0 Cable
- Olympus Dictation Management Software (ODMS) Version 6 on CD-ROM
- Leather carrying case with velcro belt loop
- Instruction manual
- 1-year warranty

#37616	Extended warranty	\$29.95

Olympus DS-2500

**NEW! Olympus DS-2500 Consumer Dictation Recorder
Windows 8 & 7 / Vista / XP, Mac OS and Dragon Compatible!**

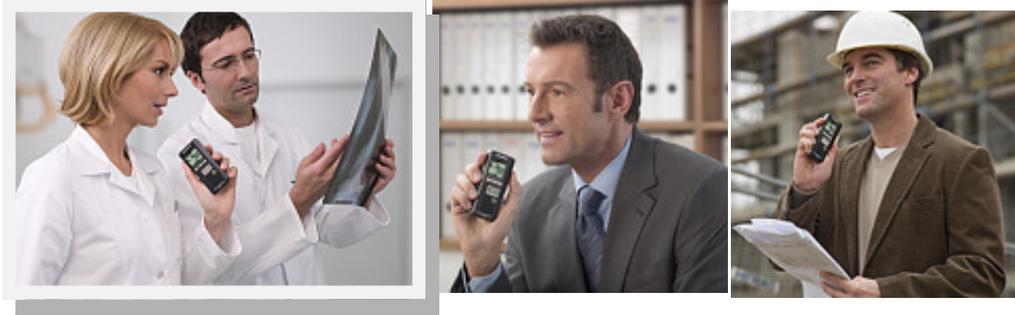

The **Olympus DS-2500** is an affordable, entry level Professional Dictation Recorder that provides superior sound quality through a speech-optimized, mechanically isolated microphone; flexibility in recording modes, including conference and dictation modes. The DS-2500 utilizes Olympus's proprietary DS2 file format to provide excellent playback through a computer, standard 3.5mm headphone jack or the integrated 23mm/300mW speaker. Through the included Olympus Dictation Management System, once plugged in via USB, the DS-2500 will automatically transfer recordings across the network or through email. The latest generation of Olympus professional dictation recorders is the most flexible handheld recording system available today and will dramatically enhance your productivity and daily workflow!

The little brother of the [Olympus DS-3500](#), the DS-2500 features the good audio quality and some workflow capabilities and only sets aside certain creature comforts, specifically, the DS-2500 uses a monochrome LCD, where the Olympus DS-3500 has a color LCD. Also, the DS-2500 does not have the 128bit and 256bit encryption like the [Olympus DS-3500](#) which is needed in professions requiring security (as in HIPAA medical use). The DS-2500 does feature SP and QP DS2 recording modes, but does not send email attachments (but is suitable on local networks). The DS-2500 uses rechargeable AAA NiMH batteries included (rather than Lithium Ion like the [Olympus DS-3500](#)), or even use regular AAA Alkaline batteries.

Perfect for any Professional who needs to dictate efficiently:

Package Includes:

- Olympus DS-2500 Consumer Digital Dictation Recorder
- 2 GB internal Micro-SD memory card
- Two rechargeable AAA Ni-Mh batteries that are charged through the recorder's USB port
- USB standard to USB Mini 2.0 Cable
- Olympus Dictation Software "STANDARD" Edition on CD-ROM
- Instruction manual
- 1-year warranty

HTH Engineering, Inc. supports your purchase of the DS-2500 with friendly, expert "concierge" technical support via telephone and/or Go-toMeeting™ for as long as you own the equipment.

PLUS:

New! Philips DPM 9600 with Voice Command

www.StartStop.com

FREE 1 DAY SHIPPING

The Philips Digital Pocket Memo 9600 series sets new standards in advanced functionality and style. Voice commands, on-board file encryption and password protection are but a few of the powerful features of the 9600. The ergonomic design lends itself to unparalleled user friendliness to create dictations, and the intuitive controls are easy to use. Coupled with SpeechExec Pro Dictate, the network-based dictation software and a docking station for uploading your files, the new 9600 is the ultimate in digital dictation.

- Robust metal casing for extra durability
- 4-position slide switch for single-handed operation
- Voice-activated recording mode for hands-free dictation
- DSS-Pro or "DSS Classic" file encoding ensures crystal-clear recording quality
- **More Secure!** Recorded files on the DPM-9600's SD Memory card can be encrypted at the card level for protection and HIPAA compliance!
- **Easier to Enter Job Data!** No fussing with tiny buttons to enter alphanumeric job data. Just train the unit once, then speak your Job Data into the recorder!
- [Optional LAN Docking station](#) means you don't even need a PC nearby for seamless file transfer over the internet
- Mix and Match the DPM-9600 on any existing Olympus or Philips transcription/dictation network with total confidence and compatibility!

Model #37630 LFH 9294 Barcode Scanner for the DPM 9600.

The Barcode Module supports barcode information containing up to 30 digits and has a built-in 64 MB memory card for up to 16 hours of recording time. The Barcode Module 9294 is compatible with the Digital Pocket Memo 9600 series and can easily be snapped into the Digital Pocket Memo.

Model #30146 LFH 9160 LAN Docking Station.

The innovative Philips LAN Docking Station adds an entirely new dimension to PC-free file transfer. It allows dictations to be transferred via LAN from the Digital Pocket Memo directly to the transcriptionist. Free of geographical constraint: dictations can be sent to any destination, whether to the room next door or anywhere in the world. There is no need to connect the docking station to a PC, no need for software, and only minimum user training is necessary. It can also be set up and maintained via remote configuration. Encryption and password protection on the Digital Pocket Memo ensure that dictations can be sent securely over the company network or the Internet.

NEW! Philips DPM-9500
Digital Pocket Memo
Windows 7/Vista /XP / 2000 Compatible!

The Digital Pocket Memo 9500 is a professional dictation recorder that is perfect for professionals and non-professionals alike who wish to upgrade to digital dictation. The 9500 includes the popular four-position slide switch for familiar, single-handed operation.

The large backlit LC display and ergonomic design with a full metal case ensure quality and usability. SpeechExec Pro Dictate, the professional dictation software, is also included for simple integration into your everyday document workflow, and crystal clear recordings are the perfect basis for efficient transcription or integration into voice recognition software.

Quick control

- Professional 4-position slide switch for single handed operation
- Intuitive menu control with 'smart buttons'
- Large backlit LCD screen for an at-a-glance overview
- USB fast charging for convenience on the go

Easy file management

- SpeechExec Pro Dictate software ensures easy download and efficient management of voice files
- USB docking station for fast file download and battery charging

Designed around industry standards

- Compatible with industry standards such as the SD card, mini-USB socket, AAA batteries, 3.5 mm headphone, and microphone sockets
- Supports the compact .dss file format, the industry standard for digital recording

DPM-9500 #37650

Philips Digital Pocket Memo LFH-93380

www.StartStop.com

Oh the difference a slide-switch makes! The Philips DPM 9380 builds on the power of the DPM 9370 by increasing efficiency and ease-of-use. The slide-switch provides tactile feedback while you control the DPM 9380 effortlessly and automatically. Download clear, compact, and industry-standard .DSS files to your computer through the included SpeechExec Dictate software. Record virtually forever with removable SD memory cards, connect to your computer through the mini-USB port (Philips is dedicated to standards compliance, no proprietary file types or connections here), and easily operate your DPM 9380 with its large backlit LCD screen, intuitive menu design, and its ergonomic design. Together it makes a complete recording package.

Features

- ▶ 4-position slide switch for single-handed operation
- ▶ Intuitive menu control with 'Smart Buttons'
- ▶ Large Backlit LCD display for an at-a-glance overview
- ▶ SpeechExec Dictate software ensures easy installation and efficient handling of voice files on your PC
- ▶ Automatic file download via USB for quick transcription
- ▶ Compatible with industry standards: SD memory, mini-USB, AAA batteries and 3.5mm headphone and microphone sockets
- ▶ Supports the compact .dss file format, the industry standard for digital recording

The Philips Digital Pocket Memo 9375 is an entry-level professional dictation recorder uniquely designed for the business user. Whether you are recording your thoughts on the go, recording meetings, practicing speeches, or creating business documents to be transcribed, the DPM 9375 has you covered. New features that set the DPM 9375 apart from its competitors is the ability to record directly to MP3; a quick, simple PC-based "Wizard" setup; automatic file emailing, archiving, or uploading via FTP; and fast recharge via USB. The DPM 9375 also allows you to set file urgency so your most important files get the attention they deserve.

One Year Warranty & 30 day Guarantee

Your investment is protected by a one-year manufacturer's warranty and our [30 day money-back guarantee](#).

Digital Pocket Memo 9375

Start-Stop Call-In Transcriber

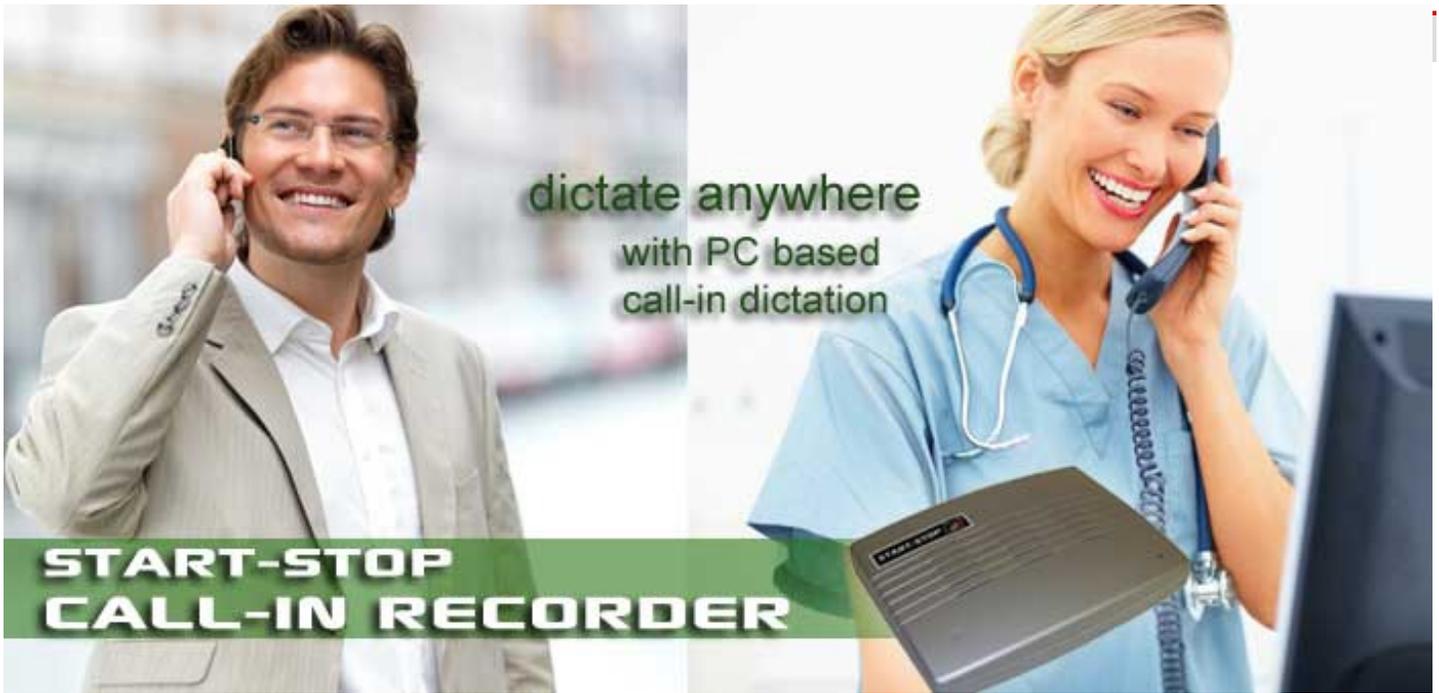

Transcription for phone-based dictation

This version of Start-Stop UNIVERSAL is designed to work with the specialty file type and in-depth demographic information collected by the Start-Stop Call-In Recorder. Call-In dictation is the economical choice for large and small organizations that require dictation and transcription. [Read more about the Start-Stop Call-In Recorder and Transcriber.](#)

Concierge Technical Support

Experience the convenience of call-in dictation without the cost of a server!

The **Start-Stop Call-In Recorder** is a PC based call-in dictation system that combines the features of a traditional call-in dictation system with the versatility and ease of use of a PC. Dictate on the road, from across the office, or from home with your cell phone, land line, or VOIP line. The Start-Stop Call-In Recorder is available in two and four line systems. Use our intuitive call-in software to easily create author IDs, manage files, and customize settings. Dictation is stored on the PC, allowing virtually limitless storage capacity.

The **Start-Stop Call-In Recorder** is perfect for legal and medical practices looking for a low cost alternative to typical call-in systems, or are looking to reduce the cost of providing handhelds while maintaining mobility.

The Start-Stop Call-In Recorder is also an ideal replacement for aging Lanier or Dictaphone call-in systems. Call us at **(866) 254-0714** and let our dictation and transcription specialists help you equip your office for mobile dictation.

BlackBerry® smartphones with the Yodal BlackBerry® dictation app can generate professional-quality voice recordings and send them by email for transcription anywhere. Yodal's unique data streaming technology puts the file in the transcriptionist's inbox faster than any other similar product available. Yodal has all the functionality of a dedicated recorder, and has a superbly designed user interface for easy use. Easily edit and review your dictation with full editing controls: insert, delete, append, play, fast forward, rewind, jump to end or beginning, and pause. After recording your dictation send it via email for transcription, archiving, or to send your recorded message to another person. **[Try Yodal free for 30 days!](#) [Call for details...](#)**

- The only BlackBerry® dictation app to stream voice recordings in real time using mobile data networks
- Robust transmission of dictation when cell coverage is spotty
- Encrypted Dictation mode (using 256-bit AES method) insures security (e.g. HIPAA Compliant)
- Highly-intuitive user interface
- Contextual menus with High-quality voice recording
- Compact codec generates only 1.2Mb per 10 minutes
- Allows full editing (review/insert/delete) of voice files with Auto-pause on incoming call
- Email-like folder structure
 - The only BlackBerry® Dictation App that:

Is a true stand-alone open solution (send to any email, play w/ free player on Windows PC)
Doesn't require integration into a large proprietary workflow solution

SpeechExec Mobile Dictation for iPhone®

Philips LFH7430

Automatic file encryption
Mobile dictation and delivery
Complete editing controls

The Philips Recorder for iPhone is the perfect solution for mobile, secure dictation. The clear and simple user interface is intuitive and easy to navigate. Dictation files are automatically encrypted for top-notch security and the app can be password protected. Dictate from anywhere with complete dictation controls and file editing capabilities.

Location-independent

The Philips Recorder for iPhone turns your smartphone into a wireless digital dictation recorder. Record dictation files at home, in the office, on a plane, or anywhere you need to record and send voice files. The ability to send dictation files through wireless transfer decreases turnaround time and dramatically increases personal productivity.

Automatic encryption

To avoid people accidentally getting access to your audio files, the highly secure Philips Recorder for iPhone offers not only the capability to encrypt files, but the application itself can be encrypted. In addition, the file transfer is also encrypted via SSL technology.

Files & Security

- 128-bit encryption
- Encrypted file transfer via SSL
- Password-protected access to the application
- Outputs standard .AAC files

Controls

- Intuitive user interface
- Simple file sorting, priority setting and metadata editing
- Full file editing functions: insert, overwrite and append
- Works with iPhone 3GS, 4 and iPad
- Push-to-talk option
- Elapsed/remaining time display

Workflow

- Integrates with SpeechExec Enterprise suite
- Sends encrypted files to Philips Mobile Server to distribute files to registered users via email
- Sends encrypted files wirelessly through WiFi, 3G or 4G network

Revolabs xTag Wireless USB Microphone

KEY FEATURES

Wireless

No wire to constrain your movement! The wireless capability, small form factor with no headset, makes the xTag USB Wireless Microphone a comfortable alternative.

Rechargeable

The xTag has a rechargeable battery that provides eight hours of talk time after each full charge. The unit will be charged any time the microphone is in the Charger Base and USB cable is connected. The xTag recharges to 85% capacity in approximately 45 minutes.

Secure

All of Revolabs Wireless Microphones use 128-bit encryption, so that no one can listen into your discussions. This is critical for HIPAA-compliance, if you are a physician and using speech recognition software to record patient notes.

Ease of Use

The xTag is a plug-and-play USB device that is instantly recognized by all operating systems and is immediately usable out of its box. It does not require any software drivers for configuration.

Technical Specifications	
Mic Type	Electret Condenser Microphone
Directionality	Omni-directional
Frequency Response	20-20,000 Hz
Sensitivity	-38dB at 1 KHz (0 dB = 1V/Pa)

Dragon Naturally Speaking Legal 12 www.StartStop.com

With all the time you'll save with Dragon NaturallySpeaking 12 Legal you can finally get around to writing that courtroom drama script you keep talking about.

And with Dragon's comprehensive legal dictionary, it *can* handle the truth.

Dragon NaturallySpeaking 12 Legal sets the standard in voice recognition software with top-notch accuracy, speed, regional accent support, and it even formats legal citations. Dictate directly into Windows based applications up to three times faster than most people type—reduce costs, turnaround time, and dependencies on support staff.

Increase the speed of communication by dictating directly to email, searching email archives, or setting up meetings—all with the speed of your own voice.

New for Version 12! Copyeditors and transcription editing is made painless with an improved, more natural-sounding text-to-speech. System administrators can also create recognition logs that provide rich, objective information about usage for guiding enterprise users in achieving better results. The log also provides valuable metrics for measuring productivity gains and return on your Dragon investment.

What has improved from 11 to 12?

Dragon NaturallySpeaking 12 improves upon the most trusted and popular voice recognition and voice activated computer software:

- 20% more accurate out of the box
- Utilizes faster computers and multi-core processing
- Enhanced use with the popular webmail applications Gmail and Hotmail
- A new interactive tutorial helps beginners and pros get the most out of their Dragon
- Use your iPhone®, iPod® touch (4th gen), iPad® or your compatible Android™ device as a remote microphone for greater freedom and flexibility on the go.
- Supports wideband Bluetooth headsets for top-quality wireless dictation
- The Auto Transcribe Folder Agent produces .DOC or .RTF files in addition to text files. You can also set it to automatically notify you of completed transcription jobs.
- Smart formatting allows you to create documents finals on your first pass
- If there is a mistake, Dragon 12 has a faster, more expansive word selection menu

Dragon Naturally Speaking

Dragon NaturallySpeaking 12 Legal sets the standard in voice recognition software with top-notch accuracy, speed, regional accent support, and it even formats legal citations. Dictate directly into Windows based applications up to three times faster than most people type—reduce costs, turnaround time, and dependencies on support staff.

Increase the speed of communication by dictating directly to email, searching email archives, or setting up meetings—all with the speed of your own voice.

Dragon NaturallySpeaking 12 Professional is not just an exceptional speech-to-text program for dictating emails, spreadsheets and documents, it is a totally hands-free way of operating your computer. Dragon Pro brings the ease of use of consumer-grade software, but with the accessibility, corporate compliance and ease of administration of an enterprise-grade productivity suite.

System administrators can create a recognition log that provides rich, objective information about usage for guiding enterprise users in achieving better results. The log also provides valuable metrics for measuring productivity gains and return on your Dragon investment.

Especially for copy editors and transcription editors, Dragon 12 also features more natural sounding text-to-speech, improving productivity and workflow.

Dragon NaturallySpeaking 12 Premium speech recognition software lets you control your digital world by voice -- three times faster than typing. Turn ideas into text at the speed of thought. Tell your PC what to do and it does it. Use Dragon to talk your way through your “to-do” list -- email, reports, spreadsheets, presentations, social networking, and more -- quickly and confidently. Use a digital voice recorder and Dragon will transcribe the audio files when you return to your PC. With Dragon as your personal assistant, you’ll get more done faster for less stress and more success -- at home, work, or wherever life takes you.

START-STOP® TRANSCRIPTION MADE EASY

For Dragon™ / Dragon NaturallySpeaking™

- ✓ Efficiently edit Dragon transcribed documents with foot pedal control
- ✓ Read along: see and hear dictation for greater accuracy

•Quickly Remove mistakes and Proof Dragon-produced documents under foot Pedal control...

While listening to the Author's voice... Without Typing!

Listen and Review under pedal Control...only type occasionally to correct a word that wasn't automatically suggested in Dragon's dictionary

Start-Stop Transcription Made Easy

Model # 87614

Includes: USB pedal, Start-Stop® Transcription Made Easy software, User Manual, Free Technical Support

Three Times Faster than Typing

Most people speak over 120 words per minute but type less than 40 words per minute. That means you can create documents and emails about three times faster with Dragon NaturallySpeaking.

Up to 99% Accurate

Dragon recognizes the user's voice instantly for excellent recognition results right out of the gate. It never makes a spelling mistake and actually gets smarter the more you use it.

Easy to Use

Dragon NaturallySpeaking installs quickly and requires no special script reading. On-screen help and tutorials turn novices into experts in no time.

Start-Stop Drag'N Mute

Model # 87514

Includes: USB pedal, Start-Stop® Drag'N Mute software, Free Technical Support, One year warranty, [30 day Money Back Guarantee](#)

Physicians, Businessmen, Ophthalmologists, Radiologists, and Pathologists can keep their hands totally free while accurately dictating into Dragon when needed and conducting conversations with others. Talk to anyone in the room, or on the phone, without inadvertently causing Dragon to pick up unintended speech.

START-STOP® DRAG'N MUTE

Foot Pedal Control for Dragon NaturallySpeaking™

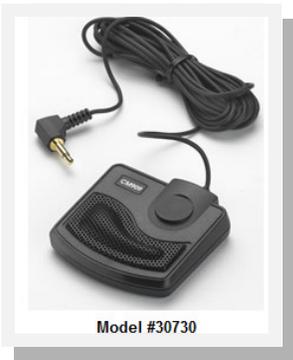

The heavy-duty, USB foot pedal allows you to easily mute your microphone while dictating with Dragon. Setup of the Plug N Play pedal is quick and simple.

Gooseneck Microphones, Bluetooth, Wireless Headsets and Wired Headset microphones can now stay constantly "live" or "open" without unintended consequences!

Drag'N Mute works with any Windows PC running Dragon versions 8 through 10: Medical, Legal, Professional, and Preferred. Drag'N Mute is an essential for today's busy professional!

Conference Recording and Transcription

Olympus DM-2 Digital Stereo Recorder

The Olympus DM-2 stereo recorder offers world-class sound quality, an all-new 2.2" color LCD display, 4GB of internal memory, a microSD expansion port, and USB recharging. Add to this a voice guidance system, support for Daisy, and voice activation to make the DM-2 the most accessible digital recorder for the sight-impaired and blind. The DM-2 sets a new standard for digital stereo recorders, bringing together the best features of the previous generation of stereo recorders at a compelling price point. Also included is Olympus's Sonority file management and editing software, allowing you to go from recorder to the web faster than ever.

Features

- **Voice Guidance:** The DM-2 will read aloud menu selections and functions so you don't have to see the recorder to access every advanced function.
- **Voice Activation:** Control your recorder with the sound of your voice—get the most from your time with this improved workflow and accessibility feature.
- **WMA, MP3, and PCM Recording:** From 48kHz, 16bit PCM recording to 8kHz 8kbps WMA recording, the DM-4/2 can record in 12 different modes, enabling up to over 977 hours of recording time.
- **USB Recharging:** Recharge your recorder whenever you plug into a USB (2.0 compatible) or with the included AC-adaptor. Combine this with 29 hours of battery life and you can leave the alkalynes at home.
- **Audio Book Compatible:** The DM-2 supports Daisy (a text-to-speech format designed for the sight-impaired), audible.com audio books, and podcast formats.
- **2.2" Color LCD:** This beautiful color display makes using your recorder easier than ever.
- **Internal and Removable Memory:** 4GB of internal memory plus a microSD expansion drive give you loads of storage.

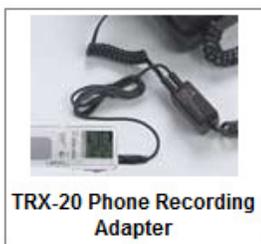

Package includes:

- Olympus DM-2
- USB cable
- Carrying Case
- Lithium Ion rechargeable battery
- Olympus Sonority software
- AC adapter
- Stereo earphones
- Strap

Olympus LS-100

The Olympus LS-100 looks weird, is built well and records like no other. The LS-100, like its spiritual ancestor the LS-10, is really designed for musicians and live music enthusiasts, but recording professionals and hobbyists will appreciate everything it has to offer: it can record, with minimal clipping, up to 140 dBspl of sound pressure; it has left and right phantom-power XLR inputs; the built-in condenser microphones are Olympus's most advanced ever; it has a built-in metronome and tuner; and an easy-to-adjust left/right balancer. Though, you don't have to follow a rock tour to get the most out of this recorder: journalists and podcasters will appreciate getting the best nat sounds, from the splash of a rare Kingfisher to the roar of the crowd. On top of that, re-listening to you kid's piano recital will never sound so

Features

- 90 degree direction stereo condenser microphones capture sound with minimal clipping, even in loud environments
- 24bit/96KhZ phantom power supply (48V-24V)
- Independent L/R levels dial
- Noise minimizing audio processor
- 4GB internal memory, expandable to 64GB with an optional SD or SDHC card
- Multi-track recording and dubbing, all in-recorder
- Color LCD

Package includes:

- Olympus LS-100
- Instruction Manual
- Lithium ion battery (LI-50B)
- USB cable
- USB conversion connector
- A514 USB AC adapter (recharger)
- Carrying case
- Strap

**Philips LFH-955 Professional
Conference Recorder
Windows 7®/Vista® / XP® / 2000® Compatible!**

www.StartStop.com

Designed to capture your meetings, the LFH-955 Professional Conference Recorder provides excellent sound quality combined with easy-to-use technology. Simple to set up, it comes in an elegant metal case for highest mobility. The path breaking conference microphone permits 360 degree pickup for comprehensive recording with maximum comfort. The extendibility of components lets the system grow with the needs of your business. Get your meeting going with the Philips LFH-955 Professional Conference Recorder.

The Philips LFH955 Conference Recording System offers a unique, powerful feature that will benefit court reporters, boardrooms, city council meetings, and focus groups: the ability to incrementally rewind the recording and listen to it, without altering or ending the recording. Example: "Let's take a vote, all in favor say Aye!". Then someone says, "Let's listen to the vote again, that was too close to call". The LFH-955 Philips recorder can then be rewound to re-play that portion of the meeting. Combined with its stellar-performance daisy-chainable microphone system, the LFH955 cannot be beat!

Wired Remote Control included, allows you to control Record/Pause, as well as set up Index Recording Marks!

Fast and simple

- Fast set up for hassle-free installation
- Easy-to-use devices for smart and time-saving workflow

Adapted to professional needs

- Future-proof thanks to extendable microphones (daisy-chaining)
- Enhanced mobility with elegant carry case
- Professional two-channel recording

Designed around industry standards

- Allows seamless working through standardized technologies
- Supports mp3 and PCM recording as well as the .dss file format, the industry standard for digital recording.

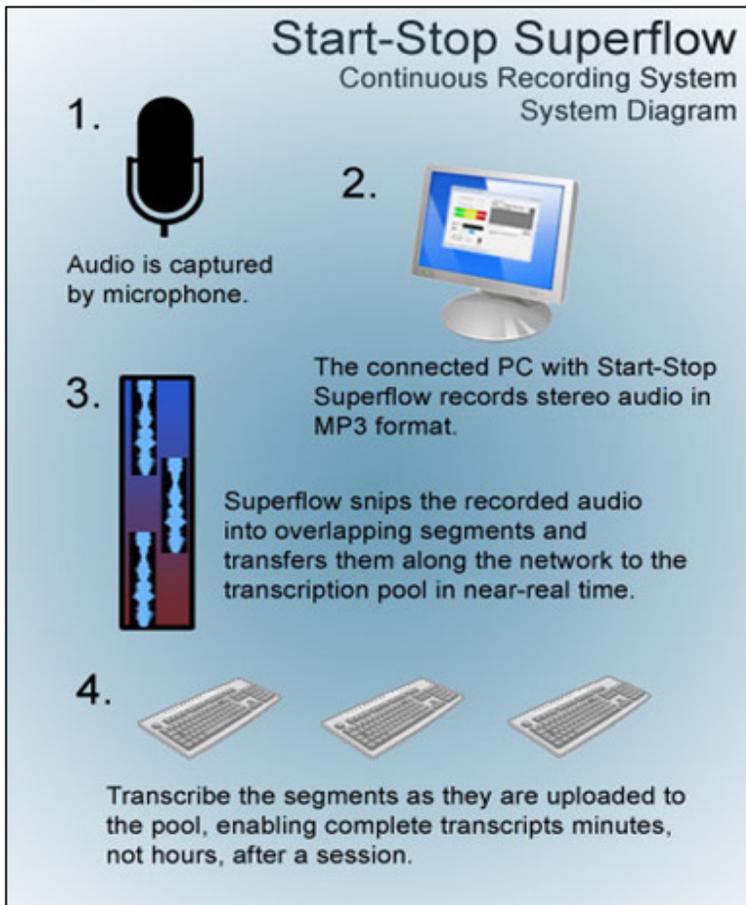

The LFH-955 Professional Conference Recorder Package includes: Digital Pocket Memo 955 (Digital Recorder), Two Philips 9172 Omnidirectional Conference Microphones, Clip-on Interview Microphone, 1GB memory card, Remote Control, USB Docking Station, SpeechExec Pro Dictate Software, USB Smart Key, Power Supply 9146, Philips SD Memory Card, Rechargeable AAA batteries 9164, Interchangeable Primary Power Adapters, Mini USB cable, Y-adaptor cable, Metal Carry Case, User manual, and 1 year warranty plus free Tech Support.

#37620	Philips LFH-955 Conference Recording System	\$997.00

The Start-Stop Superflow Continuous Recording System allows multiple transcriptionists to split and transcribe stereo audio in near-real time. The Superflow records and uploads overlapping sections to your transcription pool. Transcripts can be ready in minutes, instead of hours, after a recorded event.

The Start-Stop Superflow Continuous Recording System was custom-designed by HTH Engineering, Inc. for legislative bodies but has many applications ranging from corporate meetings, seminars, courtroom hearings, and conferences.

- ▶ Transcribe long meetings in nearly real-time, with outputted transcript available only minutes after the meeting ends, not hours.
- ▶ User-Adjustable Segment length and overlap
- ▶ Stereo (2-channel) recording at 44 KHz for crystal-clear recordings
- ▶ Industry-Standard MP3 Output
- ▶ Recorded conference segments are outputted as each one is completed, so that the transcription pool can begin work immediately.
- ▶ Customize destination directory and session name for better organization and seamless integration.
- ▶ User annotation log and time-stamped .txt file keeps track of progress and productivity.

Model #30740

Olympus ME30W Digital Conference Microphone Kit

External microphone kit for Olympus stereo recorders.

Includes 2 omnidirectional ME30W microphones with tripods and soft carrying case.

The ME30W Kit comes standard with two electret condenser microphones. Each microphone features eight feet of cable. The total length of 16 feet is suitable for conference recording in large rooms. These are low noise and high-quality omni-directional microphones. Two foldable mini tripod (TR1) stands are included. The plug-in power system means you don't have to worry about extra microphone batteries. The kit and all components fit into the carrying case for easy portability and secure handling. Can be used with Olympus Digital Stereo Voice Recorders.

2nd Generation Design for stunning quality

Standard 1/8 inch (3.5 millimeter) diameter 3-conductor plugs on each microphone cord, with stereo combiner adapter included

Record professional quality music, concerts, or meetings

Capture every sound in the room with two **ME-30W** omnidirectional microphones, and then easily use those recordings to meet your specific needs. Listen to them in high-quality stereo sound. Transcribe them using the compatible Olympus Transcriptions Kits. Or easily download them to a PC for future use. Whether from a boardroom, a courtroom, or anywhere in-between, audio recorded with the Digital Conference Microphone Kit is clearly your best solution.

CM-1000 CONFERENCE MICROPHONE

Works with any digital recorder or computer with a 3.5mm microphone port

USB version now available!

CM-1000 Conference Microphone (3.5mm plug)

Model #25540

Includes: CM-1000 Conference Microphone (sold individually), Free Technical Support, One Year Warranty

Exceptional conference recording at a fraction of the price

The CM-1000 Conference Microphone provides an effective, affordable, and extensible solution to conference recording. It is designed to work with any digital recorder with a standard 3.5mm microphone plug. Sound quality is exceptional, the price is reasonable, and it compares favorably to the more expensive offerings by the major manufacturers. Features a High-Gain Electret condenser element with higher output level to work directly with all digital conference recorders, as well as directly into a PC's microphone input. Boundary Layer Design rejects extraneous sounds from walls and ceilings, meaning you have clearer, more precise recording despite heavy background noise or echoes. Includes a 5' cord and is daisy-chainable to provide complete conference room coverage from a single recorder.

Model #30844

CM-1000 USB Conference Microphone

Model #25545

Dictation and Transcription Accessories

HTH Engineering, Inc. offers a wide variety of transcription headsets to choose from:

Spectra PC Headset - #30570

New high-quality **Spectra PC headset** is ideal for daily transcription work.

The lightweight assembly has two foam balls that rest in the cup of the ear (not in the canal) and can be worn under the chin, or on top of the head. Comes with a 10-foot cord, and provides true stereo (or mono during transcription work), with its 1/8" diameter 3-conductor standard stereo plug. This plugs into your PC's Speaker Output jack, and is ideal for use with the [Start Stop Universal Transcription System](#) on Page 8.

Spectra USB Digital Headset - #30585

Turn "inaudibles" into audibles! Ideal for transcription work under demanding conditions, with uncanny accuracy. The lightweight assembly has two foam balls that rest in the cup of the ear (not in the canal) and can be worn under the chin, or on top of the head. Comes with a 10-foot cord, In-line digital volume control with LED light, and provides true stereo (or mono during transcription work), with its USB 2.0 plug. This plugs into your PC's USB port, and is ideal for use with the [Start Stop Universal Transcription System](#) on Page 8.

FlexFone FLX-10 Headset - #30390

The FlexFone FLX-10 Headset is quite possibly the most comfortable headset for your digital transcribing. The weight measures just over an ounce! It is specially designed to fit any ear and comes with a volume control and mono/stereo switch already on the cord of the headset. And with FlexiPort, you won't ever have to unplug the headset from your computer! This plugs into your PC's Speaker Output jack, and is ideal for use with the

[Start Stop Universal Transcription System](#) on Page 8.

AL-60 USB Aluminum Headset- #30587

GN-USB Gooseneck Microphone

Model #30252

Includes: GN-USB Microphone 2/USB connection, Wind-screen, Free Technical Support, One Year Warranty

GN-3 Gooseneck Microphone

Model #30251

Includes: GN-3 Microphone w/3.5mm microphone connection, Windscreen, Free Technical Support, One Year Warranty

The **GN-3** and **GN-USB microphones** are strong, accurate, and are willing to come to you. Both feature an 18" flexible neck and sturdy weighted base, making these the professional's desktop dictation microphone. These unidirectional, monaural microphones reduce background noise and reduce windscreen noise, enabling clear desktop dictation.

The **GN-USB** is a true plug n' play device—plug in the standard USB connection and start recording. The GN-USB also features two LED indicator lights showing you when the microphone is on.

The **GN-3** microphone is standard desktop and laboratory equipment for pathologists, researchers, and physicians. Bend the gooseneck and get in close for crystal-clear dictation. The GN-3 connects with a standard 3.5mm microphone plug, making it compatible with just about any computer or recording device.

These are not big-box store quality disposable electronic toys, but rather well-built, purpose-built tools. We use these Gooseneck microphones as standard equipment for many of our Start-Stop line of professional hands-free dictation and transcription products. Many Dragon users also prefer the reliability and clarity of these microphones, as well as IT professionals and VOIP users.

#30251	GN-3 Gooseneck Microphone	\$78.00

General Purpose Foot Pedals

Start-Stop GENERAL PURPOSE PEDAL CONTROL SYSTEM

The Start-Stop General Purpose Pedal Power Control System lets you control other applications on your PC using your feet. The Foot Pedal control can send a keystroke, keystroke sequence, or mouse click to your program, with separate actions for pedal press and pedal release. A perfect productivity enhancer for secretaries, CAD and computer artists, people with RSI (repetitive stress injury) or carpal tunnel syndrome and anyone who needs to send keystrokes or mouse clicks using their feet.

Model #30482 SSPP-3-USB (3 Pedal System) USB Interface

Complete Deluxe Keystroke /Mouse Click System, including the USB 3-pedal assembly with self-contained micro-electronics and Start Stop General-Purpose PEDAL POWER software, and User's Manual, 1 Year Warranty, Toll-Free Tech Support.

- Separate actions possible for both pedal **press** and **release**.
- **Send keystrokes, mouse clicks, or keystroke sequences** to your favorite Windows 95, 98, ME, XP, 2000, NT 4.0, Vista, or 7 software!
- Generate a separate Keystroke or Mouse action for each of the 3 pedals.
- Perfect for operation with other transcription software **programs that use hotkeys** for three major transcription functions, such as Scribes MedTran or FTR Gold™ . Example: F2= Play, F3=Rewind, F4= Fast Forward
- Totally versatile operation lets you make the pedal do exactly what you want it to do.

Start-Stop Two Pedal Version Model # 30490

Complete Deluxe Keystroke /Mouse Click System, including the **PEDAL POWER** Interface Box, Model #HDP-2 Dual Pedal, Start Stop General-Purpose PEDAL POWER software, and User's Manual, 1 Year Warranty, Toll-Free Tech Support.
