Start Stop Universal Transcription System

Use the Start Stop Universal Transcription System to:

- Easily organize multiple files in the **Ultra Job Manager**. With a single keystroke you can select different jobs or play them through with no need to disrupt your transcription.
- Enhance the sound clarity with **Ultra Play Technology**. Transcribe 10 or even 20 hour-long recordings with adjustable playback speed.
- Send and receive digital transcription over the internet with **Start Stop's built-in FTP client**.
- Adjust play speed from 50% to 300% of the original speed for faster, more accurate transcription, using **Variable Speed Control**.
- Convert non-standard audio formats into standard .WAV, .MP3, or True Speech™ .WAV

Start Stop Power Play for Windows™ Media Player has these great features:

- **Variable Speed Control** gives you more control over some video formats. You can quickly review a file at twice the normal play speed or slow it down to as low as one quarter the normal speed to catch every moment.
- You can customize the size and location of the main screen window to maximize your viewing screen.
- Power Play's **Bookmark Feature** allows you to insert up to 16 bookmarks for each transcription. You can also type in separate text labels for each of the bookmarks to help you remember what they are for.
- Supported on Windows 98, Windows 2000, Windows XP, and Windows Vista™ Operating Systems.

Package Includes:

3-pedal unit, Start Stop Universal software CD-ROM, Start Stop Power Play software CD-ROM, User Manual

How to Order:
