

Enterprise-Class Workflow Solution

Olympus Web System Configuration Program (Web SCP) is designed for medium & large organizations and contains all the tools required to install, customize, and manage an ODMS environment in Workgroup mode without any hidden ongoing costs.

Olympus Web SCP offers a vast array of features and allows administrators to centrally manage and configure their ODMS environment via web browser. It streamlines cumbersome user management processes and makes it easy to manage user and group profiles in large numbers, allowing for faster and easier configuration. ODMS workflow and device settings can be locked so that organizations can implement a standard workflow for their dictation environment, ensuring total consistency and accuracy. Updating firmware and software can easily be controlled by the administrators.

Olympus Web SCP tracks the use of the Dictation and Transcription Module across the workgroup system. It also allows the IT Administrator to update the license simply by entering a new key, making it quick and easy to add more users to an ODMS environment without affecting the entire system.

FEATURES

- Configure hardware and ODMS workflow centrally from a Web Browser
- Custom installer files can be created to streamline the deployment process
- Software and firmware updates can be deployed to specific groups or users
- Licenses are centrally managed and can be updated quickly and easily
- Citrix, Windows Terminal Services, and VMware are supported
- Simple and Intuitive Redesigned User Interface
- One easy-to-buy license policy without any hidden on-going costs

The Olympus Web SCP allows IT administrators to centrally manage licenses and workflow and device configurations via a web browser, dramatically saving administrator time as well as end-user time. Almost no client-side configuration is required and the software is ready upon user launch.

OVERALL WORKFLOW MANAGEMENT FROM A WEB BROWSER

Managing a mid to large-scale organization has become more efficient with central workflow & device configuration and license management through a web browser interface.

COST SAVINGS WITH ONE-TIME FEES

No annual licensing fees, a minimum IT infrastructure requirement for setup, and concurrent licensing for ODMS and Web SCP means costs savings for the business.

EFFICIENT SOFTWARE UPDATES

Administrators can easily control firmware and software updates, decreasing end-user level time in management.

VIRTUALIZATION SUPPORT

The support of virtual environments with Citrix and Windows terminal servers allows you to keep the costs for the IT infrastructure as low as possible.

SIMPLE AND INTUITIVE REDESIGNED USER INTERFACE

Navigate the interface with ease via upgraded design. Boost your productivity and efficiency with instinctive placement of necessary tools.

Comparison between Standalone and Workgroup		
	STANDALONE	WORKGROUP (*)
License Type	Single or Multi User License (Concurrent)	Multi User License (Concurrent)
Central License Management	–	✓
Terminal Services	–	✓
Citrix	–	✓
VMware	–	✓
Central Configuration	–	✓
Group Profile Management	–	✓
Lock Settings	–	✓
Deploy Software & Firmware Updates	–	✓
Custom Installation Wizard	–	✓
Silent Installation	✓	✓

*Web SCP is required for Workgroup installation
