To launch files automatically from a Folder or Downloaded Audio file, the default Program must be set to auto launch the Start Stop Software. This guide is a general walkthrough to set defaults for specific audio type files. In this example we will use a MP3 type audio file:

1. Select the "Start" Button

2. Select "Default Programs"

3. Select "Associate a File type or Protocol with a program."

4. Scroll Down to filetype: MP3 is highlighted and the Program that is currently Default is Windows Media Player (Under "Current Default"). To Change the default player and with filetype Highlighted, click on "Change Program" (Blue Arrow).
