Intelligent, secure, clinical speech recognition solutions that recognize how you work.

Clinical documentation doesn't have to be captured at your workstation. You can start your documentation in the examination room, amend it in the cafeteria, and finish it in the hall. No matter which device you use, every word is faithfully recorded and updated instantly to support a variety of clinical workflows— on your terms.

Deploy your way
No matter how you work, there's a Dragon® Medical solution that works for you—all with fast, accurate, responsive clinical speech recognition and end-to-end security. With a single voice profile, clinicians are up and running faster across workflows, care settings, devices, and apps with a seamless, consistent, and personalized experience across back-end, front-end, on-premise and cloud-based speech solutions.

Freedom to choose
Nuance has optimized Dragon Medical for your healthcare organization's specific workflow and user needs, giving you the ability to choose the solution(s) that best fit your clinical workflows, IT infrastructure requirements, and organization's business goals.

– **Dragon® Medical One:** Cloud-based clinical speech recognition platform for documenting and communicating patient care virtually anywhere—not just at the EHR workstation.

– **Dragon® Medical embedded in EHR:** Cloud-based clinical speech recognition delivers an intelligent voice-driven user experience directly in your mobile, web-based, or desktop EHR—all with no software to install.

– **Dragon® Medical Network Edition:** On-premise clinical speech recognition solution that works seamlessly with your EHR across Windows devices.

– **Dragon® Medical Practice Edition**: On-premise clinical speech recognition solution designed for independent practices.

Key benefits
– Seamless, consistent, and personalized experience across back-end, front-end, on-premise and cloud-based speech solutions
– Ability to choose the solution(s) that best fit your clinical workflows
– Document and communicate patient care virtually anywhere— not just at the EHR workstation
– Delivers an intelligent voice-driven user experience directly in your mobile, web-based, or desktop EHR—all with no software to install
– Works seamlessly with your EHR across Windows devices
