**DS-5000 System Concept**

**Simple.**
- It is possible to install without changing the current style of work, and construct a simple system with necessary functions only.

**Reliable.**
- With the design quality cultivated with DS-4000, we have enhanced the reliability by analyzing the feedbacks from our customers and repair data.

**Flexible.**
- It was given a flexibility to handle various needs and installations, from personal use to large and middle-size offices.

**Secure.**
- Security function is enhanced considering the protection of personal information.

**Target Users**
- DS-5000 system allows us to target medium size offices which IT managers setup client devices and PCs.
