

Fix for Component error: "AMP3dj.OCX" missing or invalid

1. Uninstall your Start Stop software by going to START → CONTROL PANEL → PROGRAMS → UNINSTALL A PROGRAM
2. Uninstall your Start Stop software.
3. Go To: C:\WINDOWS\SYSWOW64 and find the file call: AMP3DL.OCX, delete this file.
4. Reboot your computer. (For systems that don't have SYSWOW64, it will be located in C:\WINDOWS\SYSTEM32
5. Once your computer gets back to desktop, Disable Norton: Locate the Norton Antivirus icon in the notifications area next to the system clock. Click the arrow next to the notification area if the Norton Antivirus icon isn't visible. Right-click the Norton icon. A new pop-up menu with a variety of security settings opens. Click "Disable Antivirus Auto-Protect." If prompted, specify the amount of time you want to disable the security program.
6. Install the Start Stop System
7. Reboot your computer
8. Your issue should be resolved.
