Perfect for anyone who wants to control when Dragon “listens” using a foot pedal!

Physicians, Businessmen, Ophthalmologists, Radiologists, and Pathologists can keep their hands totally free while accurately dictating into Dragon when needed and conducting conversations with others

Talk to anyone the room, or on the phone, without inadvertently causing Dragon to pick up unintended speech.

Gooseneck Microphones, Bluetooth, Wireless Headsets and Wired Headset microphones can now stay constantly “live” or “open” without unintended consequences!
