SpeechExec

LFH 750 series

Easy to experience

Dictation file transfer software for mobile devices

With SpeechExec Mobile it is no longer necessary to use a PC or laptop to transfer DSS files. Sending them directly from your mobile device offers even greater flexibility. The innovative and easy-to-use software application automatically scans and transfers dictation files using email or LAN. To guarantee full security, encrypted files can be processed by the application and are secured against unauthorized access. The included SD memory card adapter kit assures simple transmission of files from your Digital Pocket Memo. Mobile dictation has never been more convenient.

Simple to install and use

- Works with Windows Mobile or BlackBerry devices
- Automatic file detection / download and email generation

Advanced

- Configurable delivery options to email address or folder on Wireless LAN
- Outbox overview with configurable file purge interval
- Compact DSS or DSS Pro files guarantee less network traffic
- Encrypted DSS files prevent unauthorized access

PHILIPS

sense and simplicity

Technical specifications

Features

- **Send dictation files without a laptop or PC**
- **Simple to install**
- **Two step configuration:** first choose the file download filter options, then enter the default delivery email address
- **File download filter options:** choose among all files, End-of-Letter files, file selection list or files created by a specific author
- **Sent files are stored in an Outbox:** keeps a backup of all dictation files sent, and stores file properties as an .xml file [send date / time / file size / sent to / cc / bcc / subject]
- **Automatic purging of archived files:** To free up storage space, files can be automatically purged between 1 and 99 days (for SpeechExec SmartPhone / PDA only).
- **File transfer to WLAN folder:** files can also be delivered to a wireless local area network (WLAN) folder (for SpeechExec PDA only).
- **Copy files onto memory card:** sent files can be stored on the memory card (for SpeechExec BlackBerry only).

Green specifications

- Compliant to 2002/95/EC (RoHS)
- Lead-free soldered product

Specifications

- **Product dimensions (W x D x H):**
73 x 43 x 9 mm / 2.9 x 1.7 x 0.4 inch
- **Weight:** 15 g / 0.5 oz.

Package contents

- Single seat license
- **SD Memory Card Adapter Kit:** contains microSD card to SD adapter, microSD to miniSD adapter and a 1 GB microSD memory card containing the software application
- Installation Readme.htm and on-line help (English, French and German)

Required dictation device

- **Philips Digital Pocket Memo:** with exchangeable SD memory card

SmartPhone / PDA

Hardware requirements

- **MS Windows Mobile:** Version 5.0 or 6.0
- **Accessible card slot:** SD, miniSD or microSD
- **Email account:** Validate and support sending of e-mail attachments
- **Recommended:** UMTS

Software requirements

- **Required memory on the SP/PDA:**
1.5 MB storage space for the software
5.5 MB storage space for Microsoft .NET Framework 2.0
1.1 MB memory space
Additional storage space for sent files stored in the Outbox folder

BlackBerry*

Hardware requirements

- **Operating System:** Version 4.2
- **Accessible card slot:** SD, miniSD or microSD
- **Email account:** Valid BlackBerry account and an SMTP mail server when the telco provider has limited the size of email attachments.

Software requirements

- **Required memory on the BlackBerry:**
100 KB storage space for the software
10 MB memory space for dictation files recommended

Multiple seat licence*

SpeechExec Mobile (LFH755)

- Unlimited multiple-seat license
- CD-ROM in jewel case

* available October 2007

Product highlights

Compact convenience

The compact software makes it convenient to send DSS or DSS Pro files without a laptop or PC to a target email address or WLAN folder.

The file scanning, filter and transfer process is simply triggered simply by inserting the memory card from the Digital Pocket Memo into the (phone) device running the application.

File routing enabled

The .dss format allows additional information, such as client/patient name and document type (meta data) to be stored in the file header. This allows qualified Transcription software to read this data and route the files according to target networks or folders.

Digital Speech Standard (.dss)

The .dss file format is the international standard for professional speech processing. Offering outstanding audio quality for recorded voice, .dss files allow a high compression rate, and also reduce file size, network traffic and required storage capacity. The format also allows additional information, such as client/patient name, document type, to be stored in the file header, further facilitating file organization. The .dss Pro format is an extension of the .dss format that supports file encryption to protect confidential dictation data and optimizes speech recognition results.
