

Transcription with Olympus AS-9000

Industry-Leading Transcription Workflow Management Solution

OLYMPUS

Transcription with Olympus AS-9000 - Industry-Leading Transcription Workflow Management Solution

The AS-9000 Transcription Kit is the perfect companion with Olympus DS Series devices, the professional dictation systems that provide a complete, end-to-end business solution. Featuring a four-button foot control pedal, headset, and next-generation Olympus Dictation Management System (ODMS) Release 7 software, the AS-9000 seamlessly integrates into the workflow of your office environment to significantly streamline data sharing and distribution of dictations between professionals, departments, and multiple office locations.

A newly designed user interface provides easy set-up and navigation that creates a customized business solution to meet your needs. Workflow prioritization and communication enable effective meeting of office deadlines. Included 256-bit AES encryption with DSS Pro-Format provides trusted security for your most sensitive information. The AS-9000 can play back your encrypted files from Olympus professional dictation devices, which cannot be done on third party transcription programs.

EFFICIENT WORKFLOW MANAGEMENT FOR PRIORITY RECORDINGS

Prioritize settings and notifications for urgent recordings. Search for and filter through dictation files to effectively manage priority recordings and oversee total workflow.

SEAMLESS INTERFACE TO SPEECH RECOGNITION

Fully compatible with Nuance Dragon Speech Recognition software, AS-9000 seamlessly integrates and allows ease of transcription, further decreasing transcription time. Flexible design allows transcriptionists to add multiple author IDs to be linked to Nuance Dragon user profiles to enhance workflow efficiency.

SIMPLE AND INTUITIVE REDESIGNED USER INTERFACE

Navigate the interface with ease thanks to an upgraded design and intuitive placement of common tools. Boost productivity and efficiency with easily customizable icons and settings to align with user preferences.

SIMPLE AND INTUITIVE E-MAIL CONFIGURATION AND START-UP WIZARD

The New Start-up wizard creates a fast-easy process that will get your organization running quickly. It will guide you to set-up your network server, FTP or e-mail settings to route your dictation files to meet your needs. This easy process allows the quick set-up of web-based e-mail clients such as Gmail and MS Office 365 so your organization will be communicating quickly.

TRUSTED DATA SECURITY THROUGH STANDARD OLYMPUS ENCRYPTION

An instant 256-bit file encryption with DSS Pro-Format secures your dictation and ensures only authorized listeners can access it. A customizable backup feature enables secure storage of your files and protection against accidental data loss.

ADDITIONAL FEATURES

Efficiently route files within the organization via network server, email, or FTP. Multiple format playback, including DSS, DSS Pro, WMA, MP3 and WAV/AIFF. Automatic association of transcription documents with dictation files.
