

Solutions for Law Firms

Modern technology is enhancing the way lawyers interact with clients, changing how firms manage their businesses and altering the way information is shared. Specifically, advances in digital technology within the dictation and transcription process have transformed how law firms process recorded information. Achieve immediate, efficient and secure information capture, and reduce document turnaround time with Olympus Professional Dictation solutions.

Solutions for Businesses

An executive's time is stretched thinner than ever. As the need to generate leads and grow revenue increases, the need to keep thorough, accurate records grow proportionally. How can a businessperson automate work and share information, all while saving time and concentrating on their core competencies? Create detailed records in a fraction of the time of typing with Olympus Digital Dictation solutions and streamline the transcription process by integrating directly with any workflow and leading speech recognition software. The result is improved recordkeeping and efficiency without significantly increased overhead.

Solutions for Healthcare

Faced with the public's ever-growing need for healthcare services, doctors, radiologists, nurses and their employers are always looking for ways to improve efficiency at their practices and hospitals. Olympus Professional Dictation solutions securely streamline the recording and dissemination of critical patient data and notes, saving time and money, and can be configured to fit into any IT environment, EHR / EMR system or workflow.

Solutions for Law Enforcement

Law enforcement officials are tasked with one of the most critical roles in our communities: keeping our families safe. To do that - and make the most of taxpayer dollars - it is essential that they complete their work efficiently and accurately. Manual note-taking is time-consuming and mistake-prone, and microcassettes reproduce sound poorly and wear out quickly. That's why more and more law enforcement workers are turning to Olympus Professional Dictation solutions.

Olympus DS-9500 (Direct Replacement for DS-7000)

Simplifies professional dictation with enhanced clarity and flexibility. WiFi connectivity (DS-9500), intelligent dual microphone noise cancellation technology and impact resistant body increases workflow efficiency for today's professional.

Efficient workflow with Wi-Fi (DS-9500). Share your dictation anytime, anywhere. Thanks to the Wi-Fi connectivity, Authors no longer need to carry a PC to download the dictations

Superior accuracy. The intelligent dual microphones control the directionality to keep the focus on the person dictating and suppress ambient noise in offices, hospitals, cars, airports and other noisy environments.

Durable and Secure. Rugged 1.5-meter-shockproof, alcohol-wipe-resistant body is designed to be a strong, dependable workhorse in heavy-use environments. And with dependable security, including a 256-bit AES encryption system, it far surpasses the capabilities of typical smartphone recording devices.

Record and Edit with Ease. An ergonomic slide switch makes recording comfortable and fast, and a classic, intuitive interface allows for single handed and blind operation. Just a flick of the thumb takes you back to your intended place or back-start without looking at the screen.

- WiFi Compatibility and LAN Connector Included (DS-9500 only)
- Speech Recognition with Accuracy, Clarity and Noise-Reduction
- Crystal Clear Voice in Any Environment Using Intelligent Dual Microphones
- Professional Quality Studio Recording Built-in
- Motion Sensor and VCVA Technology
- Shock Proof Body Improves Longevity
- Alcohol wipe resistant body
- 256 bit file encryption with DSS Pro audio codec
- Directional Stereo Recording optimized for Conference settings

Olympus Dictation App - ODDS

The Olympus Dictation application for iOS and Android allows users to capture recordings on the go and instantly insert them into their office workflows.

- Fully integrated with Olympus Dictation Management System software
- Record, insert & overwrite dictations
- Send from Anywhere Anytime
- Support of audio formats DSS and DSS Pro/DS2
- Password Protected dictations supported (256 bit AES)
- Priority Setting
- Send dictations via email or FTP/FTPS
- Cost Effective
- Data transfer with Maximum Security
- Crystal Clear Recording
- Auto-split of large files via ODDS Portal
- Easily Communicate Tasks to Assistant
- Auto file upload to Olympus Transcription Software
- Central Administration: assign dedicated worktype lists to users (groups), define recipients, transfer methods, recording formats, set security features, manage licenses and more
- Available in the App Store® and the Google Play™ Store

Olympus RecMic II Series

RecMic II RM-4010P

Advanced Noise Canceling Technology
Pushbutton

RecMic II RM-4110S

Advanced Noise Canceling Technology
Slideswitch

Capture Your Voice Without Unwanted Noise

The power to deliver exceptional accuracy and EHR/PACS integration.

Noise Cancellation technology for optimum speech recognition results. The combination of dual microphones and the innovative noise cancelling technology revolutionizes speech recognition accuracy when dictating - even in extremely noisy environments. The next generation of the RecMic Series provides one of the most advanced USB microphone and therefore fulfills even the highest user demands.

Command Quickly and Quietly. No need to remember verbal commands. Intuitively positioned controls and superb ergonomics enable lightning-fast dictation and free you from unnecessary finger movements. Studio quality technology and quiet construction also blocks unwanted but difficult-to-eliminate sounds such as breath and wind vibrations with a triple-layer pop filter, cushions "click-less" buttons, and a smooth surface coating.

Antimicrobial - ergonomic - robust: perfect for daily clinic life. An antimicrobial surface supports hygienic requirements. This is why the RecMic II models are especially suitable for everyday clinic routines. The ergonomic shape and the extraordinary robustness of the products also meet the demands of the market.

Olympus AS-9000

Transcription with Olympus AS-9000 - Industry-Leading Transcription Workflow Management Solution

The AS-9000 Transcription Kit is the perfect companion with Olympus DS Series devices, the professional dictation systems that provide a complete, end-to-end business solution Featuring a four-button foot control pedal, headset, and next-generation Olympus Dictation Management System (ODMS) Release 7 software, the AS-9000 seamlessly integrates into the workflow of your office environment to significantly streamline data sharing and distribution of dictations between professionals, departments, and multiple office locations.

- Efficient workflow management for priority recordings
- Seamless interface to speech recognition
- Simple and Intuitive Redesigned User Interface
- Simple and Intuitive E-Mail Configuration and Start-up Wizard
- Trusted Data Security through Standard Olympus Encryption Efficiently route files within the organization via network server, email, or FTP
- Multiple format playback, including DSS, DSS Pro, WMA, MP3 and WAV/AIFF
- Automatic association of transcription documents with dictation files
- HID footswitch RS31H Configurable & ergonomic USB foot pedal with 4 buttons
- Easy control of transcription software (play, stop, rewind etc.)
- Extremely durable and long USB cable (2.5 m)
- Perfect ergonomics for any shoe size - Extra wide center pedal
- Center or top pedal can be locked
- HID keyboard mode (optional)
- Keyboard shortcuts support
- Multimedia keys support
- Full compatibility with Olympus' dictation management software
- Nonslip mat to keep it in place
- Under-the-chin transcription headset (stereo) E-103

ODMS - Olympus Dictation Management Software

Industry-Leading Software Workflow Management Solution.

Olympus Dictation Management System (ODMS) Release 7 Software is the virtual coordinator at the heart of an Olympus Dictation Solution.

The ODMS Release 7 dictation/transcription software suite provides an intuitive and enhanced user experience that is capable of handling new efficient workflow capabilities.

The New Start-up Wizard and ability to incorporate the WiFi features of the DS-9500 ensures your organization's success with real-time dictation file sharing and easy implementation. ODMS drives workflow automation in both on-site and off-site environments, incorporating file routing and workflow rules to enhance efficiency. 256-bit file encryption provides the latest security features for ensuring that all shared information is secured and protected in your business. ODMS provides a seamless interface with Nuance Dragon Speech Recognition Software to transcribe your dictation files automatically with back-end speech recognition.

Web System Configuration Program (AS-57)

Enterprise-Class Workflow Solution

Olympus Web System Configuration Program (Web SCP) is designed for medium & large organizations and contains all the tools required to install, customize, and manage an ODMS environment in Workgroup mode without any hidden ongoing costs.

Olympus Web SCP offers a vast array of features and allows administrators to centrally manage and configure their ODMS environment via web browser. It streamlines cumbersome user management processes and makes it easy to manage user and group profiles in large numbers, allowing for faster and easier configuration. ODMS workflow and device settings can be locked so that organizations can implement a standard workflow for their dictation environment, ensuring total consistency and accuracy. Updating firmware and software can easily be controlled by the administrators.

Olympus Web SCP tracks the User of the Dictation and Transcription Module across the workgroup system. It also allows the IT administrator to update the license simply by entering a new key, making it quick and easy to add more users to an ODMS environment without affecting the entire system.
