Turn your smartphone into a secure wireless microphone

PowerMic™ Mobile gives clinicians the freedom to complete clinical documentation using a smartphone as a wireless microphone.

More freedom, the same PowerMic experience
PowerMic Mobile turns your smartphone into a secure wireless microphone for use with Windows-based desktop clinical speech recognition solutions. Optimized for use with Dragon Medical One, Dragon Medical Network Edition, and other Nuance healthcare solutions, PowerMic Mobile gives clinicians the freedom to roam from workstation to workstation, room to room, and location to location to complete clinical documentation using a smartphone as a wireless microphone at the desktop.

Subscribe
Healthcare organizations subscribe to PowerMic Mobile, and clinicians simply download the iPhone or Android app.

Connect
Users log into any supported PC and their smartphone automatically pairs with the workstation to provide wireless connectivity for audio capture.

Capture
The smartphone’s microphone captures the audio and inputs it directly into the desktop Nuance speech recognition solution, functioning just like the PowerMic, including user programmable buttons.

PowerMic Mobile enhances clinician productivity and convenience with support for virtualized EHR deployments, user programmable buttons, and 256-bit encryption with end-to-end security over WiFi or cellular networks. Clinicians can now opt to use PowerMic Mobile as a complimentary input device, or as an alternative, to the PowerMic or other supported handheld or headset microphone.
Features and benefits

Greater clinician mobility
Clinicians can complete their patient notes at any available workstation, with or without a hard-wired microphone, as soon as they meet with each patient.

Scalable and centrally managed
PowerMic Mobile is highly scalable so it can grow with your organization and offers web-based central management for configuring and managing user accounts and preferences.

Works with virtual desktops
Desktop or thin client, at work or outside the office, PowerMic Mobile offers greater clinician mobility throughout the hospital, clinics, and at home with vendor-agnostic and endpoint-agnostic support for virtualized EHRs.

Automatic workstation pairing
PowerMic Mobile offers several intuitive mechanisms for pairing mobile devices with target applications, including Windows Login ID, Nuance Application Username, or token-based pairing.

User programmable buttons
PowerMic Mobile make dictation easier and faster with programmable on-screen buttons to control audio capture, navigate templates, and effortlessly move through clinical documents for review and editing.

Compatible with iOS and Android
App distribution via the App Store and Google Play Store significantly simplifies end user roll out.

Perfect companion to PowerMics
Support individual clinician preferences and workflows by offering a combination of hard-wired PowerMics and PowerMic Mobile throughout the healthcare organization.

Optimized for Nuance solutions
Designed to work with any Windows-based desktop solution, PowerMic Mobile has been fully tested and optimized for use with Dragon Medical One, Dragon Medical Network Edition, and other Nuance healthcare solutions.

Subscription and licensing
PowerMic Mobile requires an enterprise subscription. If your healthcare organization does not have a subscription to PowerMic Mobile, please have your site administrator contact your Nuance account executive or call 877-805-5902. If your organization has an active subscription, please contact your site administrator for installation instructions for how to download and activate PowerMic Mobile on your personal wireless device.

System requirements
Hosted Nuance Management Server (NMS) and enterprise license subscription required. Minimum device requirements include iPhone 5 (with iOS 8.0) or Android 4.3 with Internet connection and Windows 7 PC.
