Clinicians, not technology limitations, should dictate the patient story. With Nuance® Dragon® Medical One, your staff can stay productive whether they’re at the workstation or anywhere else they need to be. Our clinical speech recognition provides a consistent experience at the hospital, clinic, office, home, and on the road.

The world is your workstation
Using a secure desktop app, clinicians can use their voice to securely capture the patient story more naturally, efficiently and on their terms. Dragon Medical One provides a consistent and personalized clinical documentation experience that spans solutions, platforms, devices, and physical locations. And for the first time ever, a single Nuance Healthcare ID extends this personalized voice experience to a wide range of popular clinical productivity tools, including a growing roster of secure communication, care coordination, clinical reference, and medical education apps.

For the organization at large, the power of this cloud platform means access to data. These insights help monitor adoption trends, ensure user efficiency, help inform decisions, and reap the benefits of compatibility with Nuance and partner workflow enhancements.

The best speech recognition in the world—in the cloud

- **Always available**: Dragon Medical One is designed for speed, accuracy, and flexibility with personalized vocabularies and templates that can be accessed and shared across the widest range of devices in the industry.
- **Budget-friendly**: Affordable subscription-based pricing with little up-front capital investment.
- **Easy to install and maintain**: No complex configurations, installation options that work with the infrastructure you already have, and automatic updates mean less work for your IT staff and less hassle for your clinicians.
- **No speech profile training**: Dragon Medical One requires no voice profile training and includes accent detection and automatic microphone calibration. Dragon Medical One creates profiles that continue to adapt and improve over time to ensure an optimal clinician experience from the start.

A secure platform that speaks to everyone.
- Your clinicians are more productive with fast, accurate, and responsive dictation.
- The documentation process is consistent and personalized across devices.
- Access to data, analytics, and insights to inform better decisions.
- More complete narratives lead to faster reimbursement.
- Designed with virtualization in mind, it integrates seamlessly with your existing EHR.

A single voice profile across platforms and devices.
A single voice profile means clinicians are up and running immediately across clinical workflows, care settings, devices, and apps. This seamless, consistent, and personalized voice experience across back-end, front-end, on-premise and cloud-based speech solutions lets clinicians easily work between desktops, mobile devices and new tools outside of the EHR.
– **Limitless productivity:** Give your users the ability to speak freely and as much as they like. With Dragon Medical One, there are no per-user limits so clinicians can stay productive anywhere and focus on the unique patient story rather than usage limits.

– **Healthcare compliant:** Your speech-related data is communicated over 256-bit encryption channels using TLS protocols to ensure end-to-end security.

**Dragon Medical One is all about portability, personalization, access, insights, and compatibility.**

**Portability to work at any workstation with the Dragon Medical One Desktop Application.** Compatible with all leading EHRs, and designed with virtualization in mind, the Dragon Medical One desktop app provides secure, accurate, and portable cloud-based clinical speech recognition across a wide range of Windows® devices.

**Personalization through a single Nuance Healthcare ID.** Nuance Healthcare ID puts the power in the clinician’s hand with the ability to personalize their experience and gain access to new features, products, and services as they emerge.

**Access your voice profile beyond the EHR.** Through their unique Nuance Healthcare ID, clinicians can reap the benefits of speech-enabled workflows in a growing catalog of mobile productivity apps—including secure communication, care coordination, clinical reference, and medical education tools.

**Insights abound with Dragon Medical Analytics.** Dragon Medical Analytics gives system administrators access to individual and site-wide usage metrics and trends so they can optimize clinician efficiency, productivity, and workflows. With Dragon Medical Analytics, organizations can maximize their Nuance investments and make more informed decisions.

**Compatibility with Nuance and partner workflow enhancements.** Get even more from your Dragon Medical One investment with workflow enhancements through the cloud, including Dragon Medical Advisor, Dragon Medical PowerPack™, Dragon Medical Connect, PowerMic™ Mobile, and more than 100 web-based and mobile EHR apps voice-powered by Dragon Medical.

Put it all together, and it’s more than just a cloud platform—it’s a way to redefine the clinician’s relationship with technology.
