Start Stop Transport System

Toll-Free Order Line: (USA 48 States) (866) 254-0714 FAX: (810) 821-6940 <http://www.StartStop.com>

Send and Receive Files Securely over the Net

Features Include: **Secure File Transport System--Take your digital transcription to a new level**, using state-of-the-art encryption technology to further protect your information.

- Works with all hand-held recorders
- Runs on Windows 98, ME, 2000, and XP Operating systems
- Wizard to guide you through entire setup
- Comprehensive help on each field
- E-mail sends encrypted copy of your email to yourself—never worry about lost data!
- Sends a copy of original file to keep it intact
- Unlimited Transcribers with Individual encryption keys: only the intended transcriber will be allowed to open files
- Unique “Drive Scan” feature—scans folders automatically, sends files to destination without operator intervention

Built-in HIPAA compliant 128-bit encryption algorithm; **lets you choose from 3 secure methods** of file transport: **e-mail, FTP, or Port to Port.**

Perfect for medical and legal dictation and transcription, corporate and secure file transfer, court reporters, & others who want automatic, fast, secure transfer of their files from one point to another!

Securely move local or network audio files and transcription documents from a directory and its sub-directories from one location to another.

Only \$229 and includes CD-ROM software, Instruction Manual, Toll-free Tech Support, 1 year warranty, 30-day Customer Satisfaction Money Back Guarantee and Free software upgrades for the life of the product!

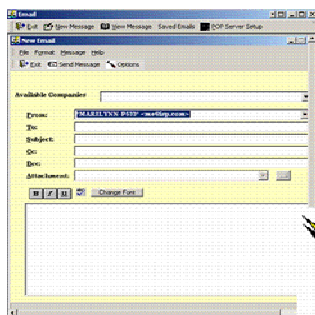

HTH Engineering, Inc. Presents....

Start Stop Transport System

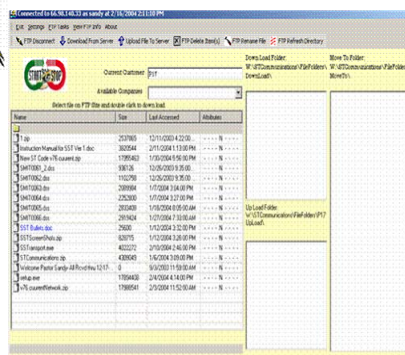

Toll-Free Order Line: (USA 48 States) (866) 254-0714 FAX: (810) 821-6940 <http://www.StartStop.com>

Use the Start Stop Transport System to transfer your information via:

1) E-mail – Email provides a single interface for composing, sending and retrieving e-mail messages using SMTP (Simple Mail Transport Protocol) to directly connect to mail servers without additional software. Instead of using separate software such as MAPI programs like MS Outlook or NetScape to format, retrieve and send messages.

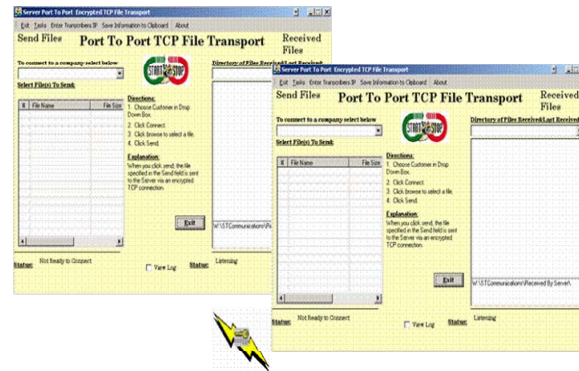

2) FTP Server - File Transport Protocol is supported for Secure Encrypted file and document transfers to FTP sites open to the Internet.

FTP “Drag & Drop” feature makes uploading & downloading simple.

3) PTP Server - Port to Port Secure Encrypted Transfer protocols are built in. Features include secure key exchange, direct connections, and extremely fast transfer times.

PTP Server completely logs incoming & outgoing transactions. Log is saved daily, and can be printed at any time!

Why HTH Engineering?

Simple. We stand by our quality products and work to ensure your satisfaction. We provide expert, friendly, and helpful Technical Support to assist you before, during and after the sale.
